**Food Safety on the Farm: Federal Programs and Legislative Action** Renée Johnson, 2010 In recent years major outbreaks of foodborne illnesses product recalls and reports about unsafe food imports have caused some to question the adequacy of the U S food safety system Stakeholders appear to agree that an optimal system should encompass a comprehensive preventive approach to food safety focusing on those foods and points in the food system that pose the greatest public health risks starting at the point of production that is on farms and ranches This report discusses differing opinions on this topic as well as related legislation *Managing Food Safety Practices from Farm to Table* Institute of Medicine, Food and Nutrition Board, Food Forum, 2009-06-12 Legal regulations and manufacturers monitoring practices have not been enough to prevent contamination of the national food supply and protect consumers from serious harm In addressing food safety risks regulators could perhaps better ensure the quality and safety of food by monitoring food production not just at a single point in production but all along the way from farm to table Recognizing the troubled state of food safety the Institute of Medicine's IOM Food Forum met in Washington DC on September 9 2008 to explore the management of food safety practices from the beginning of the supply chain to the marketplace **Globalg.a.p. Made Simple** Juli Ann D. Ogden, 2016-04-10 The Farm Plan translates technical regulations into step by step common sense Many farmers react to the highly technical presentation of food safety with irritation and insult The Farm Plan developed by a farmer who felt this very same irritation fixed it by translating the rules into every day language organizing each food safety task into a farmer's work day and putting short practical instructions on nearly every page The Farm Plan painlessly teaches the rules while checklists lead the way Clear common sense instructions tell you how when why who and where Extensive food safety training guides each step to your Global Gap audit Farm management plans are included to cover many situations that may arise on the farm As you fill in a few blanks each plan is personalized for your farm The Filing System checklist gathers the documents The Farm Checklist is a detailed guide to the requirements around the farm You'll see how all the pieces of food safety connect through the filing system as it gathers documents The Farm Plan is written and designed by a farmer for farmers The Farm Plan is the right plan for fruit and vegetable farms of all sizes Large farms will order one book for each farm management site *Food Safety on the Farm* Geoffrey S.
