Bureau of State Audits, 2014 **World Agriculture: Towards 2015/2030** Jelle Bruinsma, 2017-09-25 This report is FAO s latest assessment of the long term outlook for the world s food supplies nutrition and agriculture It presents the projections and the main messages The projections cover supply and demand for the major agricultural commodities and sectors including fisheries and forestry This analysis forms the basis for a more detailed examination of other factors such as nutrition and

undernourishment and the implications for international trade The report also investigates the implications of future supply and demand for the natural resource base and discusses how technology can contribute to more sustainable development One of the report's main findings is that if no corrective action is taken the target set by the World Food Summit in 1996 that of halving the number of undernourished people by 2015 is not going to be met Nothing short of a massive effort at improving the overall development performance will free the developing world of its most pressing food insecurity problems The progress made towards this target depends on many factors not least of which are political will and the mobilization of additional resources Past experience underlines the crucial role of agriculture in the development process particularly where the majority of the population still depends on this sector for employment and income

did they bring forth in their implementation What impact was wielded by these terms and what kinds of discursive formations did they bring forth How do actors from local to national levels interpret these new components of the heritage regime and how do actors within heritage granting national and international bodies work it into their cultural and political agency What is the role of experts and expertise and when is scholarly knowledge expertise and when is it partisan How do bureaucratic institutions translate the imperative of participation into concrete practices Case studies from within and without the UNESCO matrix combine with essays probing larger concerns generated by the valuation and valorization of culture *The Vice of Luxury* David Cloutier,2015-10-28 *Luxury* The word alone conjures up visions of attractive desirable lifestyle choices yet luxury also faces criticism as a moral vice harmful to both the self and society Engaging ideas from business marketing and economics *The Vice of Luxury* takes on the challenging task of naming how much is too much in today s consumer oriented society David Cloutier s critique goes to the heart of a fundamental contradiction Though overconsumption and materialism make us uneasy they also seem inevitable in advanced economies Current studies of economic ethics focus on the structural problems of poverty of international trade of workers rights but rarely if ever do such studies speak directly to the excesses of the wealthy including the middle classes of advanced economies Cloutier proposes a new approach to economic ethics that focuses attention on our everyday economic choices He shows why luxury is a problem explains how to identify what counts as the vice of luxury today and develops an ethic of consumption that is grounded in Christian moral convictions Decisions and Orders of the National Labor Relations Board United States. seen retirement benefits vanish Teamsters have had their pensions cut in half bankrupt cities like Detroit have walked away from their commitments to municipal workers And for Generation X the prospects are even worse a fifth of them expect to never be able to retire Only the vaunted one percent can face retirement without fear Other countries are confronting similar demographic challenges yet they have not abandoned their social contract with seniors Downhill From Here makes it clear that America too can and must do better
