

Signed Short Integer and Measurement PRACTICE

(The following are suggested activities for working on measurement.)

Transparency Activities

Purposes:

1. The activity requires the student to measure something with a ruler (1 in. = 2.54 centimeters) and determine the length of the object.
 - (1) The student will measure a rectangular object and determine the length of the object and the width of the object.
 - (2) The student will measure the length of a rectangular object and the width of the object and determine the perimeter of the object.
2. The student will be measuring some other object (e.g., a ruler) and will be able to determine the length of the object and the width of the object.

Tasks:

1. The student will measure the length of a rectangular object and the width of the object and determine the perimeter of the object. The student will be able to determine the length of the object and the width of the object and determine the perimeter of the object. The student will be able to determine the length of the object and the width of the object and determine the perimeter of the object.
2. The student will measure the length of a rectangular object and the width of the object and determine the perimeter of the object. The student will be able to determine the length of the object and the width of the object and determine the perimeter of the object.
3. The student will be able to measure the length of a rectangular object and the width of the object and determine the perimeter of the object. The student will be able to determine the length of the object and the width of the object and determine the perimeter of the object.

Activities:

1. The student will be able to measure the length of a rectangular object and the width of the object and determine the perimeter of the object. The student will be able to determine the length of the object and the width of the object and determine the perimeter of the object.
2. The student will be able to measure the length of a rectangular object and the width of the object and determine the perimeter of the object. The student will be able to determine the length of the object and the width of the object and determine the perimeter of the object.

Final Project: Other PRACTICE

Notes:

The student will be able to measure the length of a rectangular object and the width of the object and determine the perimeter of the object. The student will be able to determine the length of the object and the width of the object and determine the perimeter of the object. The student will be able to determine the length of the object and the width of the object and determine the perimeter of the object.
