Information Security Management Systems
Heru Susanto,Mohammad Nabil Almunawar,2018-06-14
This new volume *Information Security Management Systems A Novel Framework and Software as a Tool for Compliance with Information Security Standard* looks at information security management system standards risk management associated with information security and information security awareness within an organization
The authors aim to improve the overall ability of organizations to participate forecast and actively assess their information security circumstances
It is important to note that securing and keeping information from parties who do not have authorization to access such information is an extremely important issue
To address this issue it is essential for an organization to implement an ISMS standard such as ISO 27001 to address the issue comprehensively
The authors of this new volume have constructed a novel security framework ISF and subsequently used this framework to develop software called Integrated Solution Modeling ISM a semi automated system that will greatly help organizations comply with ISO 27001 faster and cheaper than other existing methods
In addition ISM does not only help organizations to assess their information security compliance with ISO 27001 but it can also be used as a monitoring tool helping organizations monitor the security statuses of their information resources as well as monitor potential threats
ISM is developed to provide solutions to solve obstacles difficulties and expected challenges associated with literacy and governance of ISO 27001
It also functions to assess the RISC level of organizations towards compliance with ISO 27001
The information provide here will act as blueprints for managing information security within business organizations
It will allow users to compare and benchmark their own processes and practices against these results shown and come up with new critical insights to aid them in information security standard ISO 27001 adoption
