

POINT PAPER

SUBJECT: Transforming the Army's Armored Brigade Combat Teams (ABCT) Role 2 to support Large Scale Ground Combat Operations (LSCO)

1.Purpose: To provide solutions and recommendations to close treatment and evacuation capabilities gaps across the active Army's ABCT Role 2 inventories.

2.Assessment: Increasing demands for care inhibit medical systems and networks for an ABCT and result in a strenuous tax on division-level Health Service Support (HSS) due to high casualty demand. The current material and organizational structures of ABCT Role 2s possess a 19% shortfall in superior care capability or capacity to manage casualty flow in LSCO environments.

3.Recommendation: To close capability gaps, the Army should align forward resuscitative surgical teams (FRST) and increase ground evacuation platforms by a factor of two (2x) per ABCT Role 2 to improve definitive care capabilities and increase evacuation capacity across unsecured lines of communication (LOC).

4.Discussion Points:

a.A US Army Role 2 provides trauma management and tactical combat casualty care (TC3), including initiating resuscitation and emergency medical treatment to ground combat forces.

b.Assigning additional medical personnel to an ABCT's Role 2 inventory will improve the capability and capacity to conduct damage control surgery and provide the brigade with different platforms to execute patient evacuation and medical resupply.

c.The Army has operated with the Role 2+ (Role 2 w/ attached FRST) concept over the past twenty (20) years. Permanently assigning the capabilities mentioned in this paper will increase unit functionality and provide better capability when a Role 2 is employed adjacent to or co-located with an ABCT's Forward Logistics Element (FLE).

d.With the addition of Role 2+ capability now organic to its task organization, the notional Role 2 possesses reiterated and redundant abilities to provide HSS at the brigade support area (BSA) and far forward at the FLE. Furthermore, the medical planner (BDE MEDO) can present the BCT commander with multiple options for distributing assets and (or) weight capabilities based on the tactical plan.

e.If the primary recommendation of this point paper is not feasible due to task organization constraints, a practical alternative course of action (COA) could be to task organize equal portions of the Army's thirty-eight (38) FRSTs across eleven (11) divisions. This COA is more realistic and is currently a part of most functional Theater
