of the doomed Donner Party allow readers to experience the arduous and often deadly journey of America's westward wagon trains while different kinds of spirits haunting old distilleries allow readers to discover how whiskey almost derailed the new American nation before it was born This book can be studied for academic purposes as a historical reference used as a source for classroom assignments or simply read for the pleasure of a great story      **National Geographic Guide to State Parks of the United States, 4th Edition** National Geographic, 2012-04-03 Packed with more colour photographs and detailed maps than any other parks guidebook on the market the National Geographic Guide to National Parks of the United States has been fully updated with comprehensive information and it acts as a practical guide to the crown jewels of the national parks system the 58 scenic national parks that conserve and protect the flora and fauna in some of America's last wilderness areas      *Forthcoming Books* Rose Arny, 2002      **Nevada**, 1995      Farm Journal, 1907      *Farm Journal and Country Gentleman*, 1906      **California. Tueller, 2012-12-06 Natural grasslands pastures and meadows are among the vegetation types most frequently investigated with phytosociological methods This was one of the reasons why volume 13 Application of vegetation science to grassland husbandry and agriculture edited by W Krause appeared as one of the first volumes of this handbook It appeared under the chief editorship of Prof R Tiixen and in his time main emphasis of the handbook was placed on Ziirich Montpellier methods and the European vegetation When we redesigned the handbook we felt the need to include other methods and aims of grassland analyses as well as a more global coverage of grasslands Especially the natural dry and semidry areas of the world needed to be covered was very fortunate in getting Prof Tueller of the University of Reno I Nevada as an editor for this volume He and the colleagues he motivated to compile volume 14 on Application of vegetation science to rangeland analysis and management have created a truly global coverage of the topics interesting for vegetation analyses in natural grasslands Since volume 13 covered the problems of anthropogenically created grasslands this topic was not expressly treated in order to avoid duplication For the same reason no specific attempt was made to get more papers from Europe and the temperate forest region in general The cooperation with Dr Tueller has been very rewarding for me
