Fake Physics: Spoofs, Hoaxes and Fictitious Science Andrew May, 2019-04-12 People are used to seeing fake physics in science fiction concepts like faster than light travel antigravity and time travel to name a few The fiction label ought to be a giveaway but some SF writers especially those with a background in professional science are so adept at technobabble that it can be difficult to work out what is fake and what is real To confuse matters further Isaac Asimov's 1948 piece about the fictitious time travelling substance thiotimoline was written not as a short story but in the form of a spoof research paper The boundaries between fact and fiction can also be blurred by physicists themselves sometimes unintentionally sometimes with tongue in cheek sometimes to satirize perceived weaknesses in research practices Examples range from hoaxes aimed at exposing poor editorial standards in academic publications through thought experiments that

sound like the plot of a sci fi movie to April Fools jokes Even the latter may carry a serious message whether about the sociology of science or poking fun at legitimate but far out scientific hypotheses This entertaining book is a joyous romp exploring the whole spectrum of fake physics from science to fiction and back again **Neutrosophic Sets and Systems, book series, Vol. 13, 2016** Florentin Smarandache, Mumtaz Ali, Abstract Contributors to current issue listed in papers order K Mondal S Pramanik F Smarandache M A Malik A Hassan S Broumi S K De I Beg A N H Zaied H M Naguib N Shah A A Salama M Eisa H E Ghawalby A E Fawzy M Sarkar S Dey T K Roy S Karatas C Kuru P J M Vera C F M Delgado M P G nzalez M L V zquez Tuhin Bera and Nirmal Kumar Mahapatra Papers in current issue listed in papers order Multi attribute Decision Making based on Rough Neutrosophic Variational Coefficient Similarity Measure Regular Single Valued Neutrosophic Hypergraphs Triangular Dense Fuzzy Neutrosophic Sets Applications of Fuzzy and Neutrosophic Logic in Solving Multi criteria Decision Making Problems Irregular Neutrosophic Graphs Neutrosophic Features for Image Retrieval Truss Design Optimization using Neutrosophic Optimization Technique Marketing skills as determinants that underpin the competitiveness of the rice industry in Yaguachi canton Application of SVN numbers to the prioritization of strategies Classical Logic and Neutrosophic Logic Answers to K Georgiev Regular Bipolar Single Valued Neutrosophic Hypergraphs Neutrosophic Topology Neutrosophic crisp Sets via Neutrosophic crisp Topological Spaces Rough Neutrosophic TOPSIS for Multi Attribute Group Decision Making Introduction to Neutrosophic Soft Groups Keywords neutrosophy neutrosophic set neutrosophic logic neutrosophic probability neutrosophic statistics neutrosophic measure neutrosophic applications

Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges Jonathan E. Suk, Kathleen M. Vogel, Amanda Jane Ozin, 2015-06-04 In September 2011 scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets These results suggested a worrisome possibility the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic In response a series of international discussions on the nature of dual use life science arose These discussions addressed the complex social technical political security and ethical issues related to dual use research This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives

Beyond the body? The Future of Embodied Cognition Guy Dove, 2016-03-22 Embodied cognition represents one of most important research programs in contemporary cognitive science Although there is a diversity of opinion concerning the nature of embodiment the core idea is that cognitive processes are influenced by body morphology emotions and sensorimotor systems This idea is supported by an ever increasing collection of empirical studies that fall into two broad classes one consisting of experiments that implicate action emotion and perception systems in seemingly abstract cognitive tasks and the other

consisting of experiments that demonstrate the contribution of bodily interaction with the external environment to the performance of such tasks Now that the research program of embodied cognition is well established the time seems right for assessing its further promise and potential limitations This research topic aims to create an interdisciplinary forum for discussing where we go from here Given that we have good reason to think that the body influences cognition in surprisingly robust ways the central question is no longer whether or not any cognitive processes are embodied Instead other questions have come to the fore To what extent are cognitive processes in general embodied Are there disembodied processes Among those that are embodied how are they embodied Is there more than one kind of embodiment Is embodiment a matter of degree There are a number of specific issues that could be addressed by submissions to this research topic Some supporters of embodied cognition eschew representations Should anti representationalism be a core part of an embodied approach What role should dynamical models play Research in embodied cognition has tended to focus on the importance of sensorimotor areas for cognition What are the functions of multimodal or amodal brain areas Abstract concepts have proved to be a challenge for embodied cognition How should they be handled Should researchers allow for some form of weak embodiment Currently there is a split between those who offer a simulation based approach to embodiment and those who offer an enactive approach Who is right Should there be a rapprochement between these two groups Some experimental and robotics researchers have recently shown a great deal of interest in the idea that external resources such as language can serve as form of cognitive scaffolding What are the implications of this idea for embodied cognition This research aims to bring together empirical and theoretical work from a diversity of perspectives Subtitling is one of the most important disciplines in the history of social sciences with the help of cognitive psychology Researchers are encouraged to submit papers to discussing the future of embodied cognition methods models or theories
