When copper(II) nitrate is transformed in a chemical reaction?

Q1a)?

Below reactions show the process in copper(II) nitrate transformation in the air. Copper gets oxidized in chemical gases present in the air. Metals react or combine in the presence of air and water. Nitrogenic gases responsible for corrosion in dissimilated metals that are all substances are present from metals and minerals. All of these substances are examples of oxidation and reduction, reduction happens in metal reactions. In this section you will explore when is happening in the chemical level in metal reactions.
