The Online Business Guide Victor Marcoianu, 2021-04-23

From online marketing strategies and development methods to the philosophy of digital thinking, *The Online Business Guide* gives you all the tools you need when starting a new business. I recommend with confidence and great pleasure the book *The Online Business Guide* written by Mr Victor Marcoianu, whom I have known for over 5 years during which time we carried out professional activities and education together. *The Online Business Guide* explains in detail what steps need to be followed to launch and promote a business in the digital environment, especially in the current conditions in which most businesses go to the online environment.

Associate Professor Eng. Iustin PRIESCU PhD

During my years as a software developer and marketing manager, I have promoted many businesses online and helped create many successful brands. I had the opportunity to work with businesses in a wide range of fields, from local businesses to the marketing of laboratory products, music bands, well-known authors, and beauty salons to universities, online malls, and amusement parks. The SenDesign activity takes place all over the globe: in Romania, in Europe, in Australia, in the USA, etc. Thus, I had the opportunity to face many problems, either technical, human, or psychological in nature. Based on experience in software development, digital marketing, and branding, I wrote *The Online Business Guide* to help you grow and reach your audience. The book is addressed to you if you are just opening a business or you are a person of interest and you want to promote yourself in the online environment. Originally published episodically on the SenDesign blog, the information is gathered, adjusted, and completed in an easy and easily digestible format. To read this guide, you do not need

advanced technical knowledge but only patience ambition and curiosity The guide does not go into programming details and is not a tutorial on creating a website Here are listed and described the methods and principles needed to create an online presence Of course any marketing or programming skill is welcome By reading the Online Business Guide you will accumulate basic notions and vital techniques to create an online marketing plan You will find out what you need to know when ordering or creating a website in the design of a logo in the creation of social media pages and your image in the online environment We will also address methods of popularizing and increasing website traffic and customer perception of the brand We will explore innovative ways to cover as wide a segment of the market as possible and turn your brand into 21st century technology Why you need a mobile app and what can you create to keep up with the competition In conclusion I will talk about how to think online and how you should behave in the digital environment in terms of my experiences with customers over the years The philosophy of success common mistakes and the abyss of the lack of trust *Web Design*
