Developing Creative Thinking to Improve Academic Writing Azza Abugharsa PhD, 2018-05-08

Developing Creative Thinking to Improve Academic Writing Part Two Advanced Level textbook helps enhancing lateral thinking within the given contextual frame in order to promote students' intellectual challenge to produce a comprehensive understanding about the topic. This facilitates flexible thinking required to write academic assignments in which arguments are presented for thorough analysis. Since rigid judgments can lead to fossilized views, it is recommended to emphasize the concept that all opinions are correct from the points of view of their holders. In this regard, this book helps college students practice improving their triangular thinking skills, which emphasize evaluation of all the aspects of the topic in an equal pattern. Furthermore, this book is useful for ESL college students as well as native speakers of English as it reinforces transformational learning principles which highlight education by inspiration rather than information. Such a strategy can motivate the students to become more creative, more practical, and more resourceful and enable them to transform their learning-related thinking abilities and attitudes in order to come to a better understanding of themselves and the world.

Reading to Learn in a Foreign Language Keiko Koda, Junko Yamashita, 2018-09-03 This book describes a theory-guided approach to Foreign Language (FL) course development, implementation, instruction, and assessment. It documents the development and implementation of a theory-guided approach designed to exploit cross-linguistically sharable competencies as resources for promoting FL learning. The volume delineates the processes of a) identifying cross-linguistically sharable competencies, b) exploring ways of exploiting sharable competencies as resources in promoting language skills through their purposeful use for content learning, c) implementing the instructional approach in multiple EFL classrooms, and d) evaluating the approach by comparing learning outcomes across classrooms. It presents a solid conceptual framework that integrates theories in multiple research domains, including second language acquisition, knowledge acquisition, and language assessment. It also provides detailed descriptions of framework construction and classroom implementation, the two processes that are integral to course design and development.
