Franco, Syeda Umama Mehreen, Anuska Joshi, 2024-06-03 This book addresses how sustainability discourse and advocacy can translate to impactful policies especially when bridging the divide between sustainability climate change and gender The book explores various areas such as conservation climate action sustainable fashion and corporate sustainability and defines the existing sustainability gaps in the selected cases country sector region It highlights the value of sustainability science and climate change on innovative approaches to research education capacity building and practice to transform rhetoric into impact sustainability while encompassing cases from various industries sectors and geographical contexts While emphasizing SDG 5 the book chapters also show the transboundary implications of gender equality and inclusivity to other sustainable development and climate change goals and targets The contributions are exemplary in highlighting the relation of gender inclusivity in strengthening efforts to protect and safeguard the world's cultural and natural heritage and making cities and human settlements inclusive and safe Goal 11 protecting restoring and promoting sustainable management of terrestrial ecosystems and reverse land degradation Goal 15 ensuring access to affordable reliable sustainable and modern energy for all Goal 7 promoting sustainable and inclusive economic growth with productive and decent employment for all Goal 8 promoting inclusive and sustainable industrialization Goal 9 adopt policies to reduce inequalities Goal 10 ensure sustainable consumption and production pattern Goal 12 addressing climate change impacts and building resilience Goal 13 and ensuring availability and sustainable management of water and sanitation for all Goal 6 **Responses to Disasters and Climate Change** Michele Companion, Miriam S. Chaiken, 2016-11-30 As the global climate shifts communities are faced with a myriad of mitigation and adaptation challenges These highlight the political cultural economic social and physical vulnerability of social groups communities families and

individuals They also foster resilience and creative responses Research in hazard management humanitarian response food security programming and other areas seeks to identify and understand factors that create vulnerability and strategies that enhance resilience at all levels of social organization This book uses case studies from around the globe to demonstrate ways that communities have fostered resilience to mitigate the impacts of climate change **Climate Change, Disaster and Adaptations** Azizur Rahman Siddiqui,Avijit Sahay,2022-02-26 This volume examines how local communities respond and adapt to ecological changes and disasters resulting from climate change The main aim of the book is to understand the range of human responses to ecological change and to contextualise the reasons for adopting any particular adaptive strategy by a community Through the help of specific case studies presented as individual chapters the book aims to find out whether adaptation due to environmental stress is an individual decision and therefore is an isolated phenomenon or if resilience and adaptation are part of the same action paradigm of society as a whole in response to environmental change Of particular interest are the case studies of climate change or disasters that have rendered the site unsuitable for the return of its community at present and thus necessitated the relocation of such communities to new locations The case studies in the book focus on regions in India but cover different parts of the world as well and address concepts of resilience vulnerability risk adaptation and mitigation The book will be useful for students and researchers in the fields of geography disaster management environmental science and anthropology

**Gender, Climate Change and Livelihoods** Joshua Eastin,Kendra Dupuy,2021-07-26 This book applies a gendered lens to evaluate the dynamic linkages between climate change and livelihoods in developing countries It examines how climate change affects women and men in distinct ways and what the implications are for earning income and accessing the natural social economic and political resources required to survive and thrive The book s contributing authors analyze the gendered impact of climate change on different types of livelihoods in distinct contexts including urban and rural and in diverse geographic locations including Asia Africa and the Caribbean It focuses on understanding how public policies and power dynamics shape gendered vulnerabilities and impacts how gender influences coping and adaptation mechanisms and how civil society organizations incorporate gender into their climate advocacy strategies

**Climate Change from a Criminological Perspective** Rob White,2012-06-12 Few would dispute the power of climate change to lead to profoundly destructive weather events At the same time the possibility of climate change as a consequence or even a cause of criminal events is far less recognized As the earth grows warmer issues regarding land use water rights bio security and food production and distribution will continue to have far reaching impact and produce more opportunity for offenses by individuals and groups as well as political and corporate entities In *Climate Change from a Criminological Perspective* a panel of pioneering green criminologists investigates an increasingly complex chain of ecological causes and effects Illegal acts are analyzed as they contribute to environmental decline e g wildlife poaching or result from ecological distress e g survival related theft Regulatory and other interventions are critiqued

concepts of environmental harm refined and new research methodologies called for And while individual events described are mainly local the contributors keep the global picture and substantial questions about human rights and social relationships firmly in mind Topics featured include Global warming as corporate crime Climate change and the courts U S and global views Climate change natural disasters and gender inequality The roles and responsibilities of environmental enforcement networks A sociocultural perspective on climate change denial PLUS instructive in depth chapters on criminological aspects of Hurricane Katrina and the Japanese nuclear disaster A volume of considerable timeliness and vision Climate Change from a Criminological Perspective will be read and discussed and will inspire action by researchers in criminology criminal justice environmental studies and related disciplines as well as policymakers *Gender and Climate Change* Joane Nagel, 2025-08-05 Does gender matter in global climate change This timely and provocative book takes readers on a guided tour of basic climate science then holds up a gender lens to find out what has been overlooked in popular discussion research and policy debates We see that around the world more women than men die in climate related natural disasters the history of science and war are intimately interwoven masculine occupations and preoccupations and conservative men and their interests drive the climate change denial machine We also see that climate policymakers who embrace big science approaches and solutions to climate change are predominantly male with an ideology of perpetual economic growth and an agenda that marginalizes the interests of women and developing economies The book uses vivid case studies to highlight the often surprising gendered impacts of climate changes This new edition is a thorough update that includes revised and new chapters and new material that takes account of the significant advances in climate research environmental and social theory and the many political and social challenges posed in the wake of US elections Covid 19 pandemic and rapidly changing climate and environment The new edition also takes account of important social and cultural movements that resist challenges to women s rights and advocate for gender sexuality and racial justice This book will appeal to students researchers and academicians interested in environmental studies and gender studies It also will be of interest to policymakers activists and others involved with environmental policy and governance **Identifying Emerging Issues in Disaster Risk Reduction, Migration, Climate Change and Sustainable Development** Karen Sudmeier-Rieux, Manuela Fernández, Ivanna M. Penna, Michel Jaboyedoff, J.C. Gaillard, 2016-08-29 The goal of this book is to explore disaster risk reduction DRR migration climate change adaptation CCA and sustainable development linkages from a number of different geographical social and natural science angles Well known scientists and practitioners present different perspectives regarding these inter linkages from around the world with theoretical discussions as well as field observations This publication contributes in particular to the discussion on the Sendai Framework for Disaster Risk Reduction SFDRR 2015 2030 and the debate about how to improve DRR including CCA policies and practices taking into account migration processes from a large perspective where both natural and social factors are crucial and mutually alloyed Some authors see

the SFDRR as a positive step forward in terms of embracing a multitude of issues others doubting that the agreement will lead to much concrete action toward real action on the ground This book is a timely contribution for researchers students and policy makers in the fields of environment human geography migration disaster and climate change studies who seek a more comprehensive grasp of contemporary development issues      **Climate Change For Dummies** Elizabeth May, John Kidder, 2022-03-31 Get clear about why climate change is so complicated and discover how you can help reverse it More and more frequent extreme weather events occur each year and planet Earth is in danger of developing more climates where life whether animal vegetable or human is unsustainable Climate Change For Dummies explains how rising temperatures shrinking lakes rising oceans and shifting weather patterns affect your life on a daily basis And of course the book goes a step further and offers suggestions about how you can take steps to limit your impact on the environment and help to reverse climate change This straightforward guide demystifies the impact of climate s No 1 enemy carbon dioxide and breaks down the many sources of this damaging but inescapable gas From there the book reveals how rising CO2 levels affect the weather water levels plant and animal species around the world the food you eat and your health But the situation isn t hopeless Climate Change For Dummies outlines actions governments industries and you can take to fight global warming and turn the tide to live in a cooler world Discover details about Short and long term effects of climate change How some actions contribute to climate change and others reduce it The many options for renewable energy and the pros and cons of nuclear energy Actions nongovernmental organizations NGOs are taking to draw attention to the climate crisis The debate around whether climate change even needs to be addressed Climate change won t be easy to overcome but when you re armed with the facts you can do your best to make a difference Let Climate Change For Dummies point you in the right direction

**Climate Hazards, Disasters, and Gender Ramifications** Catarina Kinnvall, Helle Rydstrom, 2019-06-11 This book focuses on the challenges of living with climate disasters in addition to the existing gender inequalities that prevail and define social economic and political conditions Social inequalities have consequences for the everyday lives of women and girls where power relations institutional and socio cultural practices make them disadvantaged in terms of disaster preparedness and experience Chapters in this book unravel how gender and masculinity intersect with age ethnicity sexuality and class in specific contexts around the globe It looks at the various kinds of difficulties for particular groups before during and after disastrous events such as typhoons flooding landslides and earthquakes It explores how issues of gender hierarchies patriarchal structures and masculinity are closely related to gender segregation institutional codes of behaviour and to a denial of environmental crisis This book stresses the need for a gender responsive framework that can provide a more holistic understanding of disasters and climate change A critical feminist perspective uncovers the gendered politics of disaster and climate change This book will be useful for practitioners and researchers working within the areas of Climate Change response Gender Studies Disaster Studies and International Relations      **Coping with Global Environmental**

**Change, Disasters and Security** Hans Günter Brauch,Ürsula Oswald Spring,Czeslaw Mesjasz,John Grin,Patricia Kameri-Mbote,Béchir Chourou,Pál Dunay,Joern Birkmann,2011-02-03 Coping with Global Environmental Change Disasters and Security Threats Challenges Vulnerabilities and Risks reviews conceptual debates and case studies focusing on disasters and security threats challenges vulnerabilities and risks in Europe the Mediterranean and other regions It discusses social science concepts of vulnerability and risks global regional and national security challenges global warming floods desertification and drought as environmental security challenges water and food security challenges and vulnerabilities vulnerability mapping of environmental security challenges and risks contributions of remote sensing to the recognition of security risks mainstreaming early warning of conflicts and hazards and provides conceptual and policy conclusions *New Approaches to Local Climate Change Risk Analysis* Åsa Gerger Swartling,Carlo Aall,Emmanuel M. N. A. N. Attoh,2023-12-12 The JPI Climate AXIS project Unpacking climate impact CHAINs A new generation of action and user oriented climate change risk assessments UNCHAIN is approaching its end date 31 12 2022 and the project is looking for an opportunity to collect its remaining scientific publications into a Research Topic The overall objective of UNCHAIN is to improve climate change risk assessment frameworks aimed at informed decision making and climate change adaptation action through six methodological innovations To also cover the possible need for long term and large scale efforts of societal transformation To refine a structured method of co production of knowledge and integrate this into impact modelling To develop and test an applicable framework for analyzing how societal change can affect local climate change vulnerabilities To develop and test a standardized analytical framework for addressing uncertainties involved in local decision making on climate change adaptation To integrate the trans national impacts of climate change and To link mitigation and adaptation in climate risk and vulnerability assessments Agricultural Adaptation to Climate Change Christopher R. Bryant,Mamadou A. Sarr,Kénel Délusca,2016-08-26 This book deals with one of the major challenges facing human society and its governments climate change and variability The principal objective of the book is to explore how agricultural production through the actions primarily of farmers including peasant farmers adapt to these changing circumstances what the limitations of adaptation are how the process of adaptation varies between different territories e g developed countries versus developing countries and what are or can be the most effective roles for actors other than the farmers including different levels of government and non governmental organizations NGOs such as professional associations of farmers and community organizations The principal argument is threefold 1 while there are significant differences between territories and countries in terms of the capacity of farmers and the other actors to engage in capacity building to be able to adapt effectively to climate change and variability 2 the critical roles are those played out by the farmers themselves but that 3 other actors can play an important role in accompanying farmers in their adaptation process providing relevant and strategic information counseling them and facilitating networking and meetings when appropriate This effectively means that without engaging in the local adaptation

processes governments can really only play effective roles by working with other actors at the local and regional levels When it occurs it can be very effective but when it does not farmers are left to their own devices and even then many are able to use their own creativity and local knowledge to survive and continue to develop Essentially therefore the secondary argument that is followed throughout the book is that adaptation is essentially a social process that requires an understanding of social processes and dynamics in each farming community and territory It involves an understanding for instance of information diffusion processes in the different farming communities and territories which provides a set of tools to promote and facilitate the adoption process in the context of adaptation to climate change and variability
