Cleverer David Didau, 2018-12-20 In *Making Kids Cleverer* A manifesto for closing the advantage gap David Didau reignites the nature vs nurture debate around intelligence and offers research informed guidance on how teachers can help their students acquire a robust store of knowledge and skills that is both powerful and useful Foreword by Paul A Kirschner Given the choice who wouldn't want to be cleverer What teacher wouldn't want this for their students and what parent wouldn't wish it for their children When David started researching this book he thought the answers to the above were obvious But it turns out that the very idea of measuring and increasing children's intelligence makes many people extremely uncomfortable If some people were more intelligent where would that leave those of us who weren't The question of whether or not we can get cleverer is a crucial one If you believe that intelligence is hereditary and environmental effects are trivial you may be sceptical But environment does matter and it matters most for children from the most socially disadvantaged backgrounds those who not only have the most to gain but who are also the ones most likely to gain from our efforts to make all kids cleverer And one thing we can be fairly sure will raise children's intelligence is sending them to school In this wide ranging enquiry into psychology sociology philosophy and cognitive science David argues that with greater access to culturally accumulated information taught explicitly within a knowledge rich curriculum children are more likely to become cleverer to think more critically and subsequently to live happier healthier and more secure lives Furthermore by sharing valuable insights into what children truly need to learn during their formative school years he sets out the numerous practical ways in which policy makers and school leaders can make better choices about organising schools and how teachers can communicate the knowledge that will make the most difference to young people as effectively and efficiently as possible David underpins his discussion with an exploration of the evolutionary basis for learning and also untangles the forms of practice teachers should be engaging their students in to ensure that they are acquiring expertise not just consolidating mistakes and misconceptions There are so many competing suggestions as to how we should improve education that knowing how to act can seem an impossible challenge Once you have absorbed the arguments in this book however David hopes you will find the simple question that he asks himself whenever he encounters new ideas and initiatives Will this make children cleverer as useful as he does Suitable for teachers school leaders policy makers and anyone involved in education **New**

Directions in Assessing Historical Thinking Kadriye Ercikan, Peter Seixas, 2015-02-20 New technologies have radically transformed our relationship to information in general and to little bits of information in particular The assessment of history learning which for a century has valued those little bits as the centerpiece of its practice now faces not only an unprecedented glut but a disconnect with what is valued in history education More complex processes historical thinking historical consciousness or historical sense making demand more complex assessments At the same time advances in scholarship on assessment open up new possibilities For this volume Kadriye Ercikan and Peter Seixas have assembled an international array of experts who have collectively moved the fields of history education and assessment forward Their

various approaches negotiate the sometimes conflicting demands of theoretical sophistication empirically demonstrated validity and practical efficiency Key issues include articulating the cognitive goals of history education the relationship between content and procedural knowledge the impact of students language literacy on history assessments and methods of validation in both large scale and classroom assessments New Directions in Assessing Historical Thinking is a critical research oriented resource that will advance the conceptualization design and validation of the next generation of history assessments

Academic Integrity in Canada Sarah Elaine Eaton, Julia Christensen Hughes, 2022-03-03 This open access book presents original contributions and thought leadership on academic integrity from a variety of Canadian scholars It showcases how our understanding and support for academic integrity have progressed while pointing out areas urgently requiring more attention Firmly grounded in the scholarly literature globally it engages with the experience of local practitioners It presents aspects of academic integrity that is specific to Canada such as the existence of an honour culture rather than relying on an honour code It also includes Indigenous voices and perspectives that challenge traditional understandings of intellectual property as well as new understandings that have arisen as a consequence of Covid 19 and the significant shift to online and remote learning This book will be of interest to senior university and college administrators who are interested in ensuring the integrity of their institutions It will also be of interest to those implementing university and college policy as well as those who support students in their scholarly work

Bank Exam Pedia Bharath Seeman, 2015-02-17 In this present era of competition every competitive examination consists of 5 sections Quantitative Aptitude Reasoning General English Computer Science and General Awareness related to banking industry After teaching more than 18 000 students in 28 years we have seen a lot of students spending their time practicing aptitude and reasoning alone But the students who cleared the exam would definitely say the above method of practicing would not help because merely passing in Aptitude and Reasoning sections will not help Students should also think about the other sections and overall cut off We know a lot of students who cleared all the sections but failed to clear the overall cut off In fact Practicing GK and English is the only way to raise the overall cut off So we have decided to dedicate this entire magazine just for General Awareness Banking awareness We sincerely believe that students who practice the next 100 pages would secure 40 marks from the Banking awareness section We thank Google Play for publishing our e magazine on their mobile platform We also thank our students who assisted to bring this magazine out
