Hines Jr., Odelia Funke, Joseph Losco, Patrick Stewart, 2014-10-21 This book examines the development of biopolitics as an academic perspective within political science It reviews the work of the leading proponents of this perspective and presents a comprehensive view of biopolitics as a framework to structure political inquiry

Rational Repetition Therapy (RRT) for Mental Health Professionals Joseph W. Guarine MA LMHC NCC CCMHC NBCDCH, 2022-06-17 For mental health practitioners it s very important to understand that human beings have various ways of thinking and behaving Our job is to understand each patient s thought process and behavior and to treat them accordingly The human process leads us frequently in the wrong direction The mental health therapist must be aware of this problem Therefore it s very important to examine the patient s thinking process and what they have done or are doing that may have created or may be creating their problems Some patients have difficulty not only in understanding what you advise them to do but also in following that advice Problems within the brain system may make it harder to overcome their issues but that is not always the case Ensure that the information you give them is understandable and that they follow through with it properly Always be loving and caring to each and every patient you treat The contents of this book should help you successfully treat your patients Implantable Bioelectronics Evgeny Katz, 2014-02-27 Here the renowned editor Evgeny

Katz has chosen contributions that cover a wide range of examples and issues in implantable bioelectronics resulting in an excellent overview of the topic The various implants covered include biosensoric and prosthetic devices as well as neural and brain implants while ethical issues suitable materials biocompatibility and energy harvesting devices are also discussed A must have for both newcomers and established researchers in this interdisciplinary field that connects scientists from chemistry material science biology medicine and electrical engineering *Topics on Drug Metabolism* James Paxton, 2012-02-22 In order to avoid late stage drug failure due to factors such as undesirable metabolic instability toxic metabolites drug drug interactions and polymorphic metabolism an enormous amount of effort has been expended by both the pharmaceutical industry and academia towards developing more powerful techniques and screening assays to identify the metabolic profiles and enzymes involved in drug metabolism This book presents some in depth reviews of selected topics in drug metabolism Among the key topics covered are the interplay between drug transport and metabolism in oral bioavailability the influence of genetic and epigenetic factors on drug metabolism impact of disease on transport and metabolism and the use of novel microdosing techniques and novel LC MS and genomic technologies to predict the metabolic

parameters and profiles of potential new drug candidates

[Russian Modernization](#) Markku Kivinen, Brendan G. Humphreys, 2020-11-29 Building on an original interpretation of social theory and an interdisciplinary approach, this book creates a new paradigm in the Russian studies. Taking a fresh view of Russia's multiple experiences of modernization, it seeks to explain the Putin era in a completely new way. This book explores the paradoxical and contradictory aspects of Russia, analyzing the energy-dependent economy and hybrid political regime, but also religion, welfare, and culture, and their often complex interrelations. Written by a community of both Western and Russian scholars, this book reaffirms the value of social science when confronting a society that has undergone enormous and costly systematic changes. The Russian elites see modernization narrowly as economic and technological competitiveness. The

contributors to this volume see contemporary Russia facing a series of antinomies which are macro level dilemmas that cannot be abolished either by philosophical mediation or by immediate political decisions As such they are the tension fields that constitute choices for various competing agencies This book will be of interest to scholars and students of Russian studies transition studies sociology social policy political science energy policy cultural studies and stratification studies Professionals involved in energy ecology and security policy will also find this publication a rich source
