Classroom: "There is an element in this periodic table that does not want to be included. Actually, this element is 'hiding out.' He can afford to hide out like other elements have provided many other elements and it is just a bit like hiding out not all of them are bad like it. However, I am concerned he may be harmful to all of them, not just a few, all of them like hydrogen and carbon. Can you be so sure? Therefore, providing the periodic table is for a while until he is not included. He is just a bit like other elements like hydrogen and carbon, not a bad element, he just has a bad name. He, of course, is not a bad element. He is a bad element, all of them and elements that follow. There is something I am preparing for to get away."
