How to Be a Successful Personal Trainer Chris Hitchko, 2017-07-05. This isn't a book on how to get clients or a shortcut to becoming a celebrity trainer. It's an honest approach on what to expect if you're thinking of becoming a personal trainer and to expose the fitness industry's entry standards for what they are: RIDICULOUSLY TOO EASY. Did you know the average personal trainer takes a simple 120-question test and then considers themselves a fitness professional? The majority of social media instafamous personal trainers have no idea what they are doing, and people are getting hurt because trainers lack education. The average personal trainer quits within the first couple of years. Why? How To Become A Successful Personal Trainer will answer all of these questions and help prepare you to become the best. Roadmap on How to Become A Successful Personal Trainer:

- 1 The Truth About the Personal Training Industry: Certifications vs Education
- 2 The Average Day in the Life of a Trainer: Business Aspects of Becoming a Personal Trainer
- 3 How to Get Interviewed and Hired at a Corporate Gym: Equinox, Crunch, 24 Hour Fitness
- 4 How to Make 75k as a Personal Trainer: The Benchmark for Happiness
- 5 Interviews from Top Personal Trainers

The Show Up Fitness Academy has a Board of Education with top trainers, PhDs, and doctors, along with a four-month internship. Chris Hitchko has graduated over 700 personal trainers and knows the formula to become successful in the fitness industry. Throughout his twelve-year tenure, he's collaborated with top trainers, professors, nutritionists, and doctors, which allowed him to develop a Board of Education to make sure the material and scientific information is up to date. The Show Up Fitness Personal Training Academy Board of Education:

- Professor Jason Cholewa, PhD Exercise Science, Coastal Carolina
- Layne Norton, PhD Nutritional Sciences, University of Illinois
- John Rusin, Doctorate in Physical Therapy, Dean Somerset
- CSCS Dr. Chris Perry, MD
- Joel Seedman, PhD, University of Georgia

client has performed as they strive to reach their personal fitness goals It tracks all of your workouts and has weekly and monthly measurements so you can track all your progress Losing fat and building muscle plain and simple One concept that many people seem to have a problem with is the idea that in order to keep fat off of your body you need to put on muscle While at first glance this may seem counterproductive gaining weight in order to lose weight it s all about metabolism Metabolism can be summed up as all of the chemical reactions that take place within an organism In terms of weight loss and fitness metabolism basically means all of those calories that your body burns throughout the day Your goal is to add lean tissue and in turn elevate our resting metabolic rate Muscle creates metabolism So how do we do that As we add lean muscle to our bodies the muscle will require more calories to survive Imagine adding a bunch of plug in space heaters into your apartment during the winter As we keep adding heaters the energy demands go up and our electric bill rises More heaters more heat Similarly as we keep adding lean muscle our body must use more calories to operate that new muscle Just like the space heaters More muscle more calories burned Now let s take it one step further and consider the future As we are adding lean muscle over the coming weeks and months your body will burn more and more at rest calories Let s look at our analogy of adding the heaters inside of our house There is a certain point where you have enough heaters going to keep you from getting cold and then you can set all of the heaters to their lowest setting and they will still keep your house warm no matter how cold it is outside We want enough lean muscle on our bodies so that the fat we have lost can t come back There is a tipping point when you are working out where you have developed enough lean tissue somewhere between 6 and 15 pounds that the fat you have lost can t come back because you re burning so many calories throughout the day Think of pounds of fat in terms of the calories they represent A single 1 pound of fat is roughly 3500 cal In general terms a pound of lean muscle will add an additional 20 to 30 cal per day to your metabolism That means if I were to put on 10 pounds of lean muscle I would be burning an extra 200 to 300 cal each and every day So if I have 10 pounds of fat to lose 35 000 cal that I need to put on enough muscle to compensate for that fat so that once it s gone I don t have to keep stressing about it A reasonable workout should burn between 500 and 1 000 calories in a given day weight training plus cardio CrossFit extreme cardio etc If you are working out 3 to 4 days a week which you need to be you are burning an extra 3000 to 4000 cal per week That would burn a pound of fat each week No one should be afraid of lean muscle it doesn t take very much space Ten 10 pounds of lean muscle is not much bigger than a cantaloupe as far as how much space it takes up in your body volume Just 5 pounds of fat is roughly the size of an American football You re right that s f ing gross But think of it like this you could put on 10 pounds of muscle and if you lost just 3 pounds of fat you would not be any bigger We will teach you how to do that in the following workouts So grab your water bottle get your towel and prepare to wage war on fat Let s get started The Book on Personal Training James T.
