

## Introduction to *Personal & Corporate Taxation [TX1]*

### Course description and purpose

*Personal & Corporate Taxation [TX1]* is the first of two courses in taxation in the CGA program of professional studies. It is a level four course that focuses on topics that aim to

- ensure you achieve a good understanding of the general principles and concepts of the Canadian *Income Tax Act* (ITA), as encountered by most individuals and corporations
- help you develop professional skills in the application of ITA principles and concepts to solve tax problems of individuals and corporations
- introduce you to the basic principles of income tax planning and international taxation
- introduce you to tax preparation software to aid in tax planning and in the preparation of individual T1 income tax and benefit returns

*TX1* is designed to assist you in developing professional competence and skills to

- determine a taxpayer's taxation requirements, exposure, and liability
- evaluate tax implications of proposed and completed transactions
- ensure compliance with all taxation reporting and filing requirements
- analyse and advise on tax planning issues

The CGA Program of Professional Studies is designed to help you develop the competencies that are essential to a professional accountant. To learn more about the program's competency-based approach and view the complete CGA competency list, see "[Use the course features](#)." For information on the competencies developed and strengthened specifically in *TX1* and how they relate to the course topics, see the *TX1* examination blueprint. (To access the blueprint, click "Exam preparation" in the course navigation pane.)

### Course prerequisites

- **Foundation courses:** As a level four course, *TX1* draws on the knowledge you have acquired from other subjects, specifically, financial accounting, economics, statistics, and law. A description of these prerequisite courses is available in the [CGA-Canada Syllabus](#) on the CGA-Canada website.
- **Mathematics:** You are expected to have a sound understanding of basic mathematics and its application in the business context, which you will find in any standard business mathematics text.
- **Ethics:** An understanding of ethical principles and how the accounting profession addresses ethical issues is an essential part of the CGA program of professional studies. The *Ethics Readings Handbook [ERH]* has been developed as a study resource in this area and is provided electronically through the "Reference library" link under the Resources tab.
