### **The Global Politics of Science and Technology - Vol. 2** Maximilian Mayer, Mariana Carpes, Ruth Knoblich, 2014-08-20

An increasing number of scholars have begun to see science and technology as relevant issues in International Relations IR acknowledging the impact of material elements technical instruments and scientific practices on international security statehood and global governance This two volume collection brings the debate about science and technology to the center of International Relations It shows how integrating science and technology translates into novel analytical frameworks conceptual approaches and empirical puzzles and thereby offers a state of the art review of various methodological and theoretical ways in which sciences and technologies matter for the study of international affairs and world politics The authors not only offer a set of practical examples of research frameworks for experts and students alike but also propose a conceptual space for interdisciplinary learning in order to improve our understanding of the global politics of science and technology The second volume raises a plethora of issue areas actors and cases under the umbrella notion techno politics Distinguishing between interactional and co productive perspectives it outlines a toolbox of analytical frameworks that transcend technological determinism and social constructivism

*Bulk Collection of Signals Intelligence* National Research Council, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Committee on Responding to Section 5(d) of Presidential Policy Directive 28: The Feasibility of Software to Provide Alternatives to Bulk Signals Intelligence Collection, 2015-03-24 The Bulk Collection of Signals Intelligence Technical Options study is a result of an activity called for in Presidential Policy Directive 28 PPD 28 issued by President Obama in January 2014 to evaluate U S signals intelligence practices The directive instructed the Office of the Director of National Intelligence ODNI to produce a report within one year assessing the feasibility of creating software that would allow the intelligence community more easily to conduct targeted information acquisition rather than bulk collection ODNI asked the National Research Council NRC the operating arm of the National Academy of Sciences and National Academy of Engineering to conduct a study which began in June 2014 to assist in preparing a response to the President Over the ensuing months a committee of experts appointed by the Research Council produced the report

The Secure and the Dispossessed Nick Buxton, Ben Hayes, 2015-11-20 While the world's scientists and many of its inhabitants despair at the impact of climate change corporate and military leaders see nothing but opportunities For them melting ice caps mean newly accessible fossil fuels borders to be secured from climate refugees social conflicts to be managed and more failed states in which to intervene They are securing their assets at the expanse of the planet and its inhabitants The Secure and the Dispossessed looks at these deadly approaches with a critical eye It also considers the flip side that the legitimacy of the elite is under unprecedented pressure from resistance by communities to resource grabs to those creating new ecological and socially just models for managing our energy food and water Topics covered include geoengineering militarism refugee protection greenwashing and the agricultural crisis among

on the history science and policy of tree planting and water conservation in South Africa South Africa s forestry sector has sat often controversially at the crossroads of policy and scientific debates regarding water conservation economic development and biodiversity protection Bennett and Kruger show how debates about the hydrological impact of exotic tree planting in South Africa shaped the development of modern scientific ideas and state policies relating to timber plantations water conservation invasive species control and biodiversity management within South Africa as well as elsewhere in the world Forestry and Water Conservation in South Africa shows how scientific research on the impact of exotic and native vegetation led to the development of a comprehensive national policy for conserving water producing timber and protecting indigenous species from invasive alien plants Policies and laws relating to forests and water began to change in the late 1980s and early 1990s as a result of political and administrative changes within South Africa This book suggests that the country s contemporary policies towards timber plantations guided by the National Water Act of 1998 need to be reconsidered in light of the authors findings Bennett and Kruger also call for more interdisciplinary research and greater emphasis on integrated policies and management plans for forestry invasive alien plants water conservation and biodiversity preservation

Tunnel Visions Michael Riordan,Lilian Hoddeson,Arienne W. Kolb,2015-11-20 A detailed and engaging account of the development of the superconducting supercollider one of the largest scientific undertakings in the United States Journal of American History Starting in the 1950s US physicists dominated the search for elementary particles aided by the association of this research with national security they held this position for decades In an effort to maintain their hegemony and track down the elusive Higgs boson they convinced President Reagan and Congress to support construction of the multibillion dollar Superconducting Super Collider project in Texas the largest basic science project ever attempted But after the Cold War ended and the estimated SSC cost surpassed ten billion dollars Congress terminated the project in October 1993 Drawing on extensive archival research contemporaneous press accounts and over one hundred interviews with scientists engineers government officials and others involved Tunnel Visions tells the riveting story of the aborted SSC project The authors examine the complex interrelated causes for its demise including problems of large project management continuing cost overruns and lack of foreign contributions In doing so they ask whether Big Science has become too large and expensive including whether academic scientists and their government overseers can effectively manage such an enormous undertaking Focusing on the scientific technical and political conflicts that led to delays ever rising costs and eventually the SSC s cancelation by Congress Tunnel Visions is a true techno thriller Burton Richter winner of the Nobel Prize in Physics Most good science stories are tales of discovery and success but failure can be just as riveting Here two historians and an archivist describe the greatest particle physics experiment that never was Scientific American

**The Long Game on the Silk Road** S. Frederick Starr, Svante E. Cornell, 2018-04-03 This book argues that American and European policies toward Central Asia and the Caucasus suffer from both conceptual and structural impediments It traces the framework of Western policies to the 1975 Helsinki Final Act which resulted in the stovepiping of relations into political economic and democracy categories and in often uncoordinated or contradictory policies While the authors embrace the goal of promoting human rights and democracy they argue that the antagonistic methods adopted to advance this goal have proven counter productive They propose that Western governments work with the regional states rather than on or against them and that instead of focusing directly on political systems policies should focus on developing the quality of governance and help build institutions that will be building blocks of rule of law and democracy in the long term The authors also argue that Western leaders have largely failed to grasp the significance of this region relegated it to a subordinate status and thus damaging western interests The development of sovereign economically strong and effectively self governing states in the Caucasus and Central Asia is an important goal in its own right the book stresses the importance of a region where the development and preservation of secular statehood could become a model for the entire Muslim world
