Collisions in the Digital Paradigm David John Harvey, 2017-03-23 It has been said that the only asset that a lawyer has is time But the reality is that a lawyer s greatest asset is information The practice and the business of law is all about information exchange The flow of information travels in a number of different directions during the life of a case A client communicates certain facts to a lawyer The lawyer assimilates those facts and seeks out specialised legal information which may be applicable to those facts In the course of a generation there has been a technological revolution which represents a paradigm shift in the flow of information and communication Collisions in the Digital Paradigm is about how the law deals with digital information

technologies and some of the problems that arise when the law has to deal with issues arising in a new paradigm

Coal and Coalbed Gas Romeo M. Flores, Tim A. Moore, 2024-01-24 Coal and Coalbed Gas Future Directions and Opportunities Second Edition introduces the latest in coal geology research and the engineering of gas extraction Importantly the second edition examines how over the last 10 years research has both changed focus and where it is conducted This shift essentially depicts a tale of two worlds one half Western Europe North America moving away from coal and coalbed gas research and production towards cleaner energy resources and the other half Asia Pacific region Eastern Europe South America increasing both research and usage of coal These changes are marked by a precipitous fall in coalbed gas production in North America however at the same time there has been a significant rise in coal and coalbed gas production in Australia China and India The driver for higher production and its associated research is a quest for affordable energy and economic security that a large resource base brings to any country like Australia's first large scale coalbed gas to liquid natural gas projects supplying the demand for cleaner burning LNG to the Asian Pacific region Since the last edition of this book global climate change policies have more forcibly emphasized the impact of methane from coal mines and placed these emissions equal to or even more harmful than CO₂ emissions from fossil fuels in general Governmental policies have prioritized capture use and storage of CO₂ burning coal in new highly efficient low emission power plants and gas pre drainage of coal mines The Organization for Economic Cooperation and Development OECD countries and China are also introducing new research into alternative non fuel uses for coal such as carbon fibers nanocarbons graphene soil amendments and as an unconventional ore for critical elements New to this edition Each chapter is substantially changed from the 1st edition including expanded and new literature citations and reviews important new data and information new features and materials as well as re organized and re designed themes Importantly three new chapters cover global coal endowment and gas potential groundwater systems related to coalbed gas production and biogenic gas generation as well as the changing landscape of coal and coalbed gas influenced by global

climate change and net zero carbon greenhouse gas emissions FOREWORD When I reviewed the first edition of this book my initial thought was Do we need another book on coal geology and then I read it and realised Yes we need this book and my students downloaded copies as soon as it was available So now we come to 2023 and a lot has happened in the past decade For a different reason we might ask if we still need this book or even coal geoscientists and engineers as the world aims for rapid decarbonisation of the energy sector and a reduction of coal as a feedstock for industrial resources like steel manufacture

Creating China's Climate Change Policy Olivia Gippner, 2020-02-28 Drawing on first hand interview data with experts and government officials Olivia Gippner develops a new analytical framework to explore the vested interests and policy debates surrounding Chinese climate policy making
