It provides step by step methods to prepare more timely, readable and technically accurate reports. Detailed guidelines are provided to prepare the different subjects included in this book. The use of the techniques described in this book will result in less time spent in report writing, editing, rewriting and review which will save time and money. This book is the result of nearly 50 years of experience in program and project development in the field of hydrogeology. The two main authors, P. E. LaMoreaux and Fakhry Assaad, who submitted both the idea and the major subjects of the book, have been closely associated during this period with the Geological Survey of Egypt, the General Desert Development Organization in Egypt, the U.S. Geological Survey, USGS, the Geological Survey of Alabama, the University of Alabama, and in a great variety of consulting projects in different States of America and over the world. It is based on experience from the assignment and supervision of many professionals with a great variety of academic training and experience. **Library Journal**, 1953 **Library Journal** Melvil Dewey, Richard Rogers Bowker, L. Physical Geology Jeffrey R. Knott, Wayne Henderson, Kristin Weaver Bowman, Patricia Butcher, 2016-08-02. This book is intended for an introductory geology class for non-science majors. The homework chapters on plate tectonics, the rock cycle and topographic maps may be used as review or introduction to digitally delivered lab assignments on these topics. Optimally, this manual is used in conjunction with digitally delivered assignments and local field trips. For the instructor, this textbook provides the common topics that are covered in an introductory geology lab class.
