Planet Without Apes:

Planet Without Apes Craig Stanford, 2012-11-05 Can we live with the consequences of wiping our closest relatives off the face of the Earth and all the biological knowledge about ourselves that would die along with them Extinction of the great apes threatens to become a reality within a few human generations Stanford tells us how we can redirect the course of an otherwise bleak future

World Without Weight Daniel Povinelli, 2012 In every domain of reasoning humans deploy an wide range of intuitive theories about how the world works So are we alone in trying to make sense of the world by postulating theoretical entities to explain how the world works or do we share this ability with other species This is the focus of this new book from Daniel Povinelli

Wild Man from Borneo Robert Cribb, Helen Gilbert, Helen Tiffin, 2014-01-31 *Wild Man from Borneo* offers the first comprehensive history of the human orangutan encounter Arguably the most humanlike of all the great apes particularly in intelligence and behavior the orangutan has been cherished used and abused ever since it was first brought to the attention of Europeans in the seventeenth century The red ape has engaged the interest of scientists philosophers artists and the public at large in a bewildering array of guises that have by no means been exclusively zoological or ecological One reason for such a long term engagement with a being found only on the islands of Borneo and Sumatra is that like its fellow great apes the orangutan stands on that most uncomfortable dividing line between human and animal existing for us on what has been called the dangerous edge of the garden of nature Beginning with the scientific discovery of the red ape more than three hundred years ago this work goes on to examine the ways in which its

human attributes have been both recognized and denied in science philosophy travel literature popular science literature theatre museums and film The authors offer a provocative analysis of the origin of the name orangutan trace how the ape has been recruited to arguments on topics as diverse as slavery and rape and outline the history of attempts to save the animal from extinction Today while human populations increase exponentially that of the orangutan is in dangerous decline The remaining wild men of Borneo are under increasing threat from mining interests logging human population expansion and the widespread destruction of forests The authors hope that this history will by adding to our knowledge of this fascinating being assist in some small way in their preservation

Chimpanzees, War, and History R. Brian Ferguson, 2023 The question of whether men are predisposed to war runs hot in contemporary scholarship and online discussion Within this debate chimpanzee behavior is often cited to explain humans propensity for violence the claim is that male chimpanzees kill outsiders because they are evolutionarily inclined suggesting to some that people are too The longstanding critique that killing is instead due to human disturbance has been pronounced dead and buried In *Chimpanzees War and History* R Brian Ferguson challenges this consensus Bringing readers on a journey through theoretical struggle and clashing ideas about chimpanzees bonobos and evolution Ferguson opens new ground on the age old question are men born to kill

Before Humanity Stefan Herbrechter, 2021-12-13 *Before Humanity* takes up the question of the post in the posthuman from the position of ancestrality Speculating about who or what comes after the human inevitably throws us back to our very beginnings The before in *Before Humanity* in this context takes on two meanings 1 what happened before we apparently became human which translates into a critical reading of paleo anthropology as well as

evolutionary narratives of hominization 2 living through the end of a certain humanist anthropocentric notion of humanity
 what tasks lie before us which provokes a critical reading of the Anthropocene and current narratives of geologization In
 other words Before Humanity investigates conceptualizations of humanity and asks whether we have ever been human and if
 not what could or maybe what should we have been *World Without Secrets* Richard Hunter,2002-04-19 With rapid
 evolution and deployment of new information and computing technologies the age of ubiquitous computing is upon us Human
 beings will be to an ever greater extent surrounded by machines that monitor record and analyze everything that occurs

 on businesses society and individuals This book explores the implications of the world without secrets discusses policy
 options and looks at the future of information crime **Planet of the Apes** Ian Edginton,Paco Medina,2001 Several decades

 civil war that s erupted between ape rebels advocating human integration and the fearful but powerful ape regime Is the ape
