| Error Code | Cause and countermeasures | SE error. Switch membrane not available. Order Control Panel. | |
|------------|---|---|-------------|
| -SE- | Key short error(10 sec.). Replace any control panel or smart board. | | |
| E-11 | Sensor open error. Check unplugged sensor, wiring or smart board. If necessary, replace sensor. If error code appears when starting sensor function, replace smart board. | SMH9187B/XAA | DE94-02001A |
| E-12 | Sensor short error. Check shorted sensor or smart board. If necessary, replace sensor. If error code appears when starting sensor function, replace smart board. | DW18187W/XAA | DE94-02001D |
| E-13 | Sensor TI max time error. Check sensor. If necessary, replace sensor. If error code appears when starting sensor function, replace smart board. | SMH9187ST/XAA | DE94-02001C |

TO TEST BLOWER WINDINGS: 1. Disconnect power and remove grill. 2. Open control panel and discharge capacitor. 3. Disconnect the two wires to the run capacitor. Continuity test across the two wires should be approximately 61 ohms of resistance. This test allows you to read across all windings at the same time.

Oven Thermal Cutoff

The oven thermal cutoff (Cavity TOC) is located on the top side of the oven cavity beside exhaust duct with a temperature rating of 248°F (120°C) and is **NOT** resettable.

The cutoff is tightly held to the top of the oven cavity under the duct support.

Hood Thermal Cutoff

This cutoff will protect the touch control from excessive heat by turning the vent fan on at low speed. If the venting units of the range are used for long periods of time heat will build up and could damage the microwave control. In order to prevent this, a thermal cutoff is installed on the duct behind the controls. This cutoff will close (158 F/70 C - vent fan energized) and open (104°F/40°C - vent fan de-energized) depending on temperature.

Magnetron Thermal Cutoff

The magnetron thermal cutoff is located above the leads to the magnetron. It is designed to prevent damage to the magnetron if an overheated condition develops in the tube due to cooling fan failure, obstructed air ducts, dirty or blocked air intake. Under normal operation, the magnetron thermal cutoff remains closed. However, when abnormally high temperatures are reached within the magnetron, the magnetron thermal cutoff will open at 302°F (150°C) causing the oven to shut down. After the temperature drops to 140°F (60°C) it will reset and cooking will be able to resume.

Bottom Thermal Cutoff

During a fire on the stove the heat could be intense enough to close the Hood Thermal Cutoff and force the fan to run. While at moderately high temperature we do want it to run, however during a fire it is advantageous to **NOT** have the vent fan running. So if a fire were to start on the stove top the Bottom Thermal Cutoff would open at 248°F (120°C) and remove all power to the microwave oven. This cutoff is **NOT** resettable.

Samsung Smh9187 Installation Manual

LIZZY. NEWLAND

Samsung Smh9187 Installation Manual:

Thank you enormously much for downloading **Samsung Smh9187 Installation Manual**. Most likely you have knowledge that, people have seen numerous times for their favorite books taking into consideration this Samsung Smh9187 Installation Manual, but end in the works in harmful downloads.

Rather than enjoying a fine book bearing in mind a cup of coffee in the afternoon, otherwise they juggled similar to some harmful virus inside their computer. **Samsung Smh9187 Installation Manual** is manageable in our digital library an online entry to it is set as public thus you can download it instantly. Our digital library saves in multipart countries, allowing you to get the most less latency era to download any of our books with this one. Merely said, the Samsung Smh9187 Installation Manual is universally compatible similar to any devices to read.
