The handsome baby face of Hartford's new Community Civil Rights Activist and Author Luis Malave has written one of the most courageously and shockingly honest memoir ever. His heartfelt candor makes this novel like no other. This blockbuster tells all about his life, career, and more on his shockingly revealing revelations of being a victim of violence, racism, and even of sexual abuse. Malave takes readers behind the scenes of some of the biggest topics of our time.

India's Economic Resurgence C B Rao, 2018-10-26 Economics is a social science concerned mainly with description and analysis of the production, distribution, and consumption of goods and services. Beyond the various theories and models, however, economics has a close relationship with day-to-day life. This book reviews the economic journey of India over the last seventy years and seeks to stimulate the readers' thinking on some major issues and potentialities facing the Indian economy. Five main themes flow through the book: India's potential to be the World's third largest economic power by 2030; the challenges of socio-economic equity that India faces; the several opportunities that India has in that journey; the critical role of governance, leadership, management, and administration; and the importance of mindset changes to power India's future economic growth. A special focus is laid on the role of government policies and projects in socio-economic development. The book sensitises the readers, including college students in general and students of economics in particular, to the happenings around us which have significant economic import. The book makes all through its seventy chapters several suggestions to power India's growth as a global economic superpower on a plank of socioeconomic equity. This book serves as an expansive thought primer and focussed execution guide for an economically independent and resurgent India.

Smartphones within Psychological Science David A. Ellis, 2020-09-24 Psychologists can now quantify behaviours beyond the laboratory using a mass adopted unified system that is primed for data capture on a smartphone. This is the first book to bring together related areas of smartphone research and point towards how psychology can benefit and engage with these developments in the future. It critically considers how smartphones and related digital devices help answer and generate new research questions for psychological science. The book then guides readers through how smartphones are being used within psychology and social science more broadly. Drawing from examples of both good and bad practice within current research, a new perspective is brought to major themes and debates across behavioural science. In the digital age, smartphones and associated devices will be able to accomplish much more in the near future. Psychology has a key role to play when it comes to balancing this monumental potential with carefully considered research.

Pyne,2018-10-23 Fire is special Even

among the ancient elements fire is different because it alone is a reaction. It synthesizes its surroundings; it takes its character from its context. It varies by place, by culture, and by time. It has no single expression. There is no single way to understand it. In this collection of essays, historian and renowned fire expert Stephen J. Pyne offers his reflections on national and global wildland fire management. Pyne distills the long saga of fire on Earth and its role in underwriting an Anthropocene that might equally be called a Pyrocene. Presented through a mixture of journalism, history, and literary imagination, *Here and There* moves the discussion of fire beyond the usual formations of science and policy within a national narrative to one of thoughtful interpretation, analysis, and commentary. Centered on the unique complexities of fire management in a global world, *Here and There* offers a punctuation point to our understanding of wildfire. Included in this volume: How fire policy has changed within the United States; How policy in the United States differs from that in other countries; The history of one of the most famous fire paintings of all time; Suggested next steps for the future of fire research.

Soft Computing for Problem Solving Kedar Nath Das, Jagdish Chand Bansal, Kusum Deep, Atulya K. Nagar, Ponnambalam Pathipooranam, Rani Chinnappa Naidu, 2019-11-27. This two-volume book presents the outcomes of the 8th International Conference on Soft Computing for Problem Solving (SocProS 2018). This conference was a joint technical collaboration between the Soft Computing Research Society, Liverpool Hope University, UK, and Vellore Institute of Technology, India, and brought together researchers, engineers, and practitioners to discuss thought-provoking developments and challenges in order to select potential future directions. The book highlights the latest advances and innovations in the interdisciplinary areas of soft computing, including original research papers on algorithms, artificial immune systems, artificial neural networks, genetic algorithms, genetic programming, and particle swarm optimization, and applications in control systems, data mining, and clustering, finance, weather forecasting, game theory, business, and forecasting applications. It offers a valuable resource for both young and experienced researchers dealing with complex and intricate real-world problems that are difficult to solve using traditional methods.
