Strategic Approach in Multi-Criteria Decision Making Nolberto Munier, Eloy Hontoria, Fernando Jiménez-Sáez, 2019-01-29

This book examines multiple criteria decision making (MCDM) and presents the Sequential Interactive Modelling for Urban Systems (SIMUS) as a method to be used for strategic decision making. It emphasizes the necessity to take into account aspects related to real world scenarios and incorporating possible real life aspects for modelling. The book also highlights the use of sensitivity analysis and presents a method for using criteria marginal values instead of weights which permits the drawing of curves that depicts the variations of the objective function due to variations of these marginal values. In this way, it also gives quantitative values of the objective function allowing stakeholders to perform a comprehensive risk analysis for a solution when it is affected by exogenous variables.

Strategic Approach in Multi-Criteria Decision Making: A Practical Guide for Complex Scenarios is divided into three parts. Part 1 is devoted to exploring the history and development of the discipline and the way it is currently used. It highlights drawbacks and problems that

scholars have identified in different MCDM methods and techniques Part 2 addresses best practices to assure quality MCDM process Part 3 introduces the concept of Linear Programming and the proposed SIMUS method as techniques to deal with MCDM It also includes case studies in order to help document and illustrate difficult concepts especially related to demands from a scenario and also in their modelling The decision making process can be a complex task especially with multi criteria problems With large amounts of information it can be an extremely difficult to make a rational decision due to the number of intervening variables their interrelationships potential solutions that might exist diverse objectives envisioned for a project etc The SIMUS method has been designed to offer a strategy to help organize classify and evaluate this information effectively
