McCutcheon, 2021-06-08 Although many would today argue that the onetime dominance of the phenomenology of religion has receded and with it the traditional approach to studying religion as a unique and deeply felt experience that defies explanation the essays collected here take quite the opposite stand that this approach has merely been re branded and continues to characterize much work being done in the field today Offering a different way forward one that is based on experiences gained by the members of the Department of Religious Studies at the University of Alabama a program that has successfully reinvented itself over the past 20 years the book includes a variety of practical suggestions for how members of Religious Studies departments can revise their approach to studying and teaching about religion Seeing religion instead as mundane but always exemplary of basic social elements found all across cultures the volume argues that the way forward for this field lies not in the specialness of its object of study but instead the fact that thinking and acting as if something is special is itself an ordinary aspect of history and culture Making just this shift helps the scholar of religion to contribute to wide interdisciplinary conversations all across the Humanities and Social Sciences demonstrating the practical relevance of their work      **Getting Into Oxford and Cambridge 2023 Entry** Mat Carmody, 2022-05-16 25th edition of this annually updated guide packed with essential advice to help students win one of the fiercely sought after places at Oxford or

**Flags, Color, and the Legal Narrative** Anne Wagner, Sarah Marusek, 2021-05-24 On behalf of Professor Hugh Brady Director and Senior Fellow The Flag Research Center at the University of Texas School of Law Flags Color and the Legal Narrative Public Memory Identity and Critique Springer 2021 has been selected as the recipient of our Gherardi Davis Prize is presented for a significant contribution to vexillological research for the year 2021 This work was selected because of its breadth and depth in examining flags as meaningful transmitters of significant symbolic information concerning the origins culture self image and values of a society We believe it represents a signal achievement in the study of flags that sets a new standard for research in the field The Flag Research Center founded in 1962 is dedicated to furthering knowledge and advancing understanding of the human need to create and use symbols to express political cultural and social ideals through flags and flag related material culture The book deals with the identification of identity based on culturally specific color codes and images that conceal assumptions about members of a people comprising a nation or a people within a nation Flags narrate constructions of belonging that become tethered to negotiations for power and resistance over time and throughout a people s history Bennet 2005 defines identity as the imagined sameness of a person or social group at all times and in all circumstances While such likeness may be imagined or even perpetuated the idea of sameness may be socially politically culturally and historically contested to reveal competing pasts and presents Visually evocative and ideologically representative flags are recognized symbols fusing color with meaning that prescribe a story of unity Yet

through semiotic confrontation there may be different paths leading to different truths and applications of significance. Knowing this and their function, the book investigates these transmitted values over time and space. Indeed, flags may have evolved in key historical periods but contemporaneously transpire in a variety of ways. The book investigates these transmitted values. Which values are being transmitted? Have their colors evolved through space and time? Is there a shift in cultural and/or collective meaning from one space to another? What are their sources? What is the relationship between law and flags in their visual representations? What is the shared collective and/or cultural memory beyond this visual representation? Considering the complexity and diversity in the building of a common memory with flags, the book interrogates the complex color-coded sign system of particular flags and their meanings attentive to a complex configuration of historical, social, and cultural conditions that shift over time.

**Advance Praise for *Flags, Color, and the Legal Narrative***

In an epoch of fragmentation, isolation, and resurgent nationalism, the flag is waved but often forgotten. The flag's colors, narratives, shape, and denotations go without saying. The red flag over China, the Star Spangled Banner, the Tricolore are instantly recognizable and overdetermined, representing a people, a nation, a culture, languages, legacies, leaders. In this fabulous volume, flags are revealed as concentrated, complex chromatic assemblages of people, place, and power in and through time. It is in bringing a multifocal awareness of the modes and meanings of flag and color in public representations that is particular strength.

Editors Anne Wagner and Sarah Marusek have gathered critical thinkers from the North and South East and West to help know the essential and central yet often forgotten and not seen work of flags and color in narratives of nation, conflict, struggle, and law. A kaleidoscopic contribution to the burgeoning field of visual jurisprudence, this volume is essential to comprehending the ocular machinery through which power makes and is seen to make the world.

Kieran Tranter, Chair of Law Technology and Future Faculty of Law, Queensland University of Technology, Australia

This comprehensive volume of essays could not be arriving at a more opportune time. The combined forces of climate change, inequality, and pandemic are causing instability and painful recognitions of our collective uncertainties about nationhood and globalism. In the United States, where I am writing these few lines, our traditional red-white-blue flag has been collapsed into two colors: Red and Blue. While these colors have semiotically deep texts, the division of the country into these two colors began with television stations designing how to report the vote count in the 2000 presidential election year, creating red and blue parties and states. The colors stuck and have become customary. We Americans are told all the time by pundits that we are a deeply divided nation, as proven by unsubtle colored maps. To a statistician, we are a Purple America, though the color is unequally distributed. White, the color of negotiation and peace, is rarely to be found. To begin to approach understanding the problems flagged in my brief account requires the insight of multiple disciplines. That is what Wagner and Marusek, wonderful scholars in their own work, have assembled as editors: a conversation among scholars at the forefront of thinking about how flags and colors represent those who claim them, thus exemplifying how to resist simple explanations and pat answers. The topic is just too important.

Visuals such as symbols and images in addition to conventional textual forms seem to have a unique potential for the study of a collective identity of a community and its traditions as well as its narratives and at the same time in the expression of one's ideas, impressions and ideologies in a specific socio-political space. Visual analysis thus has become a well-established domain of investigations focusing on how various forms of text, external semiotic resources such as culturally specific symbols including patterns and colors make it possible for scholars to account for and thus demystify discursive symbols in a wider social and public space.

*Flags, Identity, Memory: Critiquing the Public Narrative through Colors* as an international and interdisciplinary volume is a unique attempt to demystify the thinking, values, assumptions and ideologies of specific nations and their communities by analyzing their choice of specific patterns and colors represented in a national flag. It offers a comprehensive and insightful range of studies of visual and hidden discursive processes to understand social narratives through patterns of colours in the choice of national flags and in turn to understand their semiotic, philosophical and legal cultures and traditions. Wagner and Marusek provide an exclusive opportunity to reflect on the functions, roles and limits of visual and discursive representations. This volume will be a uniquely resourceful addition to the study of semiotics of colours and flags in particular how nations and communities represent their relationship between ideology and pragmatism in the repository of identity, knowledge and history.

Vijay K Bhatia, Chinese University of Hong Kong, Full Professor, Hong Kong

In all societies, colors play a critical function in the realm of symbolism. Nation societies perceive great significance in the colors of flags and national emblems. Colors constitute in other words sign systems of national identity. The relation of color codes and their relation to concepts of nationhood and its related narratives is the theme of this marvelous and eye-opening collection of studies. Flags are mini-texts on the inherent values and core concepts that a nation espouses and for this reason the colors that they bear can be read at many levels from the purely representational to the inherently cultural. Written by experts in various fields, this interdisciplinary anthology will be of interest to anyone in the humanities, social sciences, jurisprudence, narratology, political science and semiotics. It will show how a seemingly decorative aspect of nationhood, the colors on flags, tells a much deeper story about the human condition.

Mindlessness Thomas Joiner, 2017-07-03

A contemplative practice with Buddhist roots, mindfulness is the awareness that arises from paying attention on purpose in the present moment, non-judgmentally. Practicing mindfulness can be an effective adjunct in treating psychological disorders such as depression, anxiety and addiction. But have we gone too far with mindfulness? Recent books on the topic reveal a troubling corruption of mindfulness practice for commercial gain with self-help celebrities hawking mindfulness as the next miracle drug. Furthermore, common misunderstanding of what mindfulness really is seems to be fueled by a widespread cultural trend toward narcissism, egocentricity and self-absorption. Thomas Joiner's *Mindlessness* chronicles the promising rise of mindfulness and its perhaps inevitable degradation. Giving

mindfulness its full due both as a useful philosophical vantage point and as a means to address various life challenges Joiner mercilessly charts how narcissism has intertwined with and co opted the practice to create a Frankenstein s monster of cultural solipsism and self importance He examines the dispiriting consequences for many sectors of society e g mental health education politics and ponders ways to mitigate if not undo them Mining a rich body of research Joiner also makes use of material from popular culture literature social media and personal experience in order to expose the misuse of mindfulness and to consider how we as a society can back away from the brink salvaging a potentially valuable technique for improving mental and physical wellbeing      Oxford Handbook of Perioperative Practice Suzanne J.
