Technology standard	Massachusetts Technology Standard Standard 1. Curriculum Framework	Curriculum Standard Massachusetts Mathematical Standards Math, Grade 5, Operations and Algebraic Thinking 5.OA Write and interpret numerical expressions. 1. Use parentheses, brackets, or braces in numerical expressions, and evaluate expressions with these symbols. 2. Write simple expressions that record calculations with numbers, and interpret numerical expressions without evaluating them. For example, express the calculation "Add 8 and 7, then multiply by 2" as $2 \times (8 + 7)$. Recognize that $3 \times (18932 + 921)$ is three times as large as $18932 + 921$, without having to calculate the indicated sum or product.
Materials, Resources, Technology, Personnel	In order to do my guided activity, I will need the Active Board and my own laptop so that I can show my website on the Active Board. In order to do my independent student activity and to teach the technology standard that I want my students to learn, I need each of my students to have a computer. I am going to give them access to a document that has a BINGO game card on it, and I will need them each to print out the BINGO card so that they learn how to select a printer and print properly. For this, they will need internet access on their computers so that they can go to my website and download the BINGO card. I will also need a projector (the Active Board), a printer, and access to internet.
