Sustainable Organic Agriculture for Developing Agribusiness Sector

Nikola Puvača, Vincenzo Tufarelli, 2021-08-18 Developing sustainable organic agriculture and resilient agribusiness sector is fundamental keeping in mind the value of the opportunity presented by the growing demand for healthy and safe food globally with the expectation for the global population to reach 9.8 billion by 2050 and 11 billion by 2100 Lately the main

threats in Europe and worldwide are the increasingly dynamic climate change and economic factors related to currency fluctuations. While the current environmental policy provides several mechanisms to support agribusinesses in mitigating organic food for daily increasing human population and stability of the currency, it does not contemplate the relative readiness of individuals and businesses to act correctly. Organic farming is the practice that relies more on using sustainable methods to cultivate crops and produce food animals avoiding chemicals and dietary synthetic drug inputs that do not belong to the natural ecosystem. Organic agriculture can also contribute to meaningful socioeconomic ecologically sustainable development and significantly in the development of the agribusiness sector especially in developing countries.

Researchers and practitioners are interested in organizational ethics because the different approaches used to develop such a context generate many other positive business outcomes. While the

connection between organizational ethics and employee stakeholder well being has been explored moving forward with a number of new investigations should push the literature forward This book seeks to explore these important topics and present a more comprehensive overview of organizational ethics and stakeholder well being in the business environment Such inquiry is important because the linkages between business ethics and stakeholders if well managed have the capacity to benefit both companies and employees In addition the content of this book should serve to guide future investigations within this area of business ethics *Resources in Education* ,1997
