Racing Series launched in 1966 and was designed to showcase a new class of sporty domestic cars racing on road courses. Each major automotive manufacturer participated heavily in the Trans Am Series and in a few short years it became the ultimate American automobile showdown. When the modified muscle cars of the series were seen performing well on the country's finest tracks, fans wanted a model of their own in the driveway. These pony cars boasted a new look and style not seen before and their all-around performance eclipsed anything accomplished by production-based American GT cars up to that point. This softcover edition of *The Cars of Trans Am Racing* is unique in that it focuses on the cars used in this legendary series. These vintage Mustangs, Camaros, Challengers, Barracudas, Firebirds, Cougars, and Javelins all are extremely popular with collectors and enthusiasts today. Seeing them in their full competition versions when they were new will bring back many fond memories for those who were fans of this series. In addition, enthusiasts who enjoy these cars today look to the Trans Am Series cars for styling inspiration and performance hints as part of the growing Pro Touring trend. Many of these historic cars have been restored to race-ready condition. Additional insight and interviews from the original builders and the teams that maintained the cars provide an insider's viewpoint never before seen in print.

**Pink Cars and Pocketbooks** Jessica A. Brockmole, 2025-01-14 A fascinating history of how the automotive industry and consumers battled to define what women wanted in a car. Since the commercial introduction of the automobile, US automakers have always sought women as customers and advertised accordingly. How then did car culture become so masculine? In *Pink Cars and Pocketbooks*, Jessica Brockmole shares the untold history of women's relationship with automobiles, a journey marked by struggle, empowerment, and the relentless pursuit of independence. This groundbreaking work explores the evolution of women's automotive participation and the cultural shifts that have redefined their roles as drivers, mechanics, and consumers. Brockmole traces the rise of gendered marketing of automobiles over the course of the twentieth century. Auto companies created ads that conformed to commonly held ideas about women's relationships with automobiles. As the century progressed, marketing to women became less informative and even more gendered; the automotive industry portrayed women as passengers, props, or reluctant drivers interested primarily in aesthetics. And yet, by

the 1970s female drivers were communicating directly with each other forming clubs and teaching each other through women focused repair manuals By examining market research studies advertising archives trade journals women s magazines newspapers driving handbooks and repair manuals this book shows how women bought their way into the automobile and masculine car culture Brockmole uncovers the stories of pioneering women who defied conventions such as trailblazer Alice Ramsey the first woman to drive across the United States in 1909 and Barb Wyatt whose contributions to automotive manuals broke new ground Women have always been users of technology and this book illustrates how the auto industry evolved as well as how it chose not to evolve in response
