QUESTION 1

Various options are provided as possible answers to the following questions. Choose the correct answer and write **ONLY** the LETTER (A-D) next to the QUESTION NUMBER (1.1-1.6) on your folio paper. Example 1.7: D.

- 1.1 The graphs below show the relationship between the net force and the acceleration for two masses X and Y.

Which one of the following statements is true?

- A. Mass of X is greater than mass of Y.
B. Acceleration of X is greater than acceleration of Y.
C. Mass of Y is greater than mass of X.
D. The slope of X is greater than the slope of Y.
- 1.2 In which of the following cases would the resultant force acting on an object be equal to 0N?
- A. A car moving with constant acceleration.
B. A ball falling from the sky to the ground with constant acceleration.
C. A car moving with constant velocity on a horizontal road.
D. A car moving with constant acceleration.
- 1.3 Which of the statements below best describes Weightlessness?
- A. An object moving upwards with constant velocity.
B. An object moving upwards with constant acceleration.
C. An object moving upwards with constant velocity or downwards with constant acceleration.
D. An object moving downwards with constant acceleration.
- 1.4 The inertia of an object...
- A. Is greater in space than on Earth.
B. Depends on the speed of the object in the space.
C. Is the resistance to any change in its state of motion.
D. Depends on the mass of the object in the space.
- 1.5 An astronaut has a weight F_g on Earth. What distance, in terms of the radius of the Earth (r), will the astronaut be if his weight is a 1/4 of his weight (F_g) on the

surface of the Earth?

- A. $2r$
B. r
C. $1.5r$
D. $0.5r$
- 1.6 A box is pushed forward with a force of 100N but does not move. A possible reason for this is that:
- A. Friction force is greater than 100N.
B. Friction force is more than 100N.
C. Friction force is less than 100N.
D. None of the above.

QUESTION 2

The grade 11 learners learn that there is more than one way to determine the resultant of two vectors. One way is the component method. They want to use this method to find the resultant of the forces acting on a bucket by the ropes from which the bucket is suspended. The bucket is stationary.

- 2.1 Find the resultant. (2)
- 2.2 The tension in rope P is 100N at an angle of 30° to the vertical and the tension in Q is 51,52N at 45° to the vertical.

Calculate the MAGNITUDE of the:

- 2.2.1 Resultant components of P and Q horizontally. (4)
2.2.2 Resultant components of P and Q vertically. (4)
2.2.3 Resultant of the horizontal components. (5)
2.2.4 Resultant of the vertical components. (5)
2.2.5 Resultant of the forces acting on the bucket. (5)
- 2.3 Calculate the mass of the bucket. (3)

Ionospheric Prediction and Forecasting Bruno Zolesi,Ljiljana R. Cander,2013-09-25 This book describes how to predict and forecast the state of planet Earth s ionosphere under quiet and disturbed conditions in terms of dynamical processes in the weakly ionized plasma media of the upper atmosphere and their relation to available modern measurements and modelling techniques It explains the close relationship between the state of the media and the radio wave propagation conditions via this media The prediction and forecasting algorithms methods and models are oriented towards providing a practical approach to ionospherically dependent systems design and engineering Proper understanding of the ionosphere is of fundamental practical importance because it is an essential part of telecommunication and navigation systems that use the ionosphere to function or would function much better in its nonappearance on the Earth and on any planet with an atmosphere

The Politics of Green Transformations Ian Scoones,Melissa Leach,Peter Newell,2015-01-09 Multiple green transformations are required if humanity is to live sustainably on planet Earth Recalling past transformations this book examines what makes the current challenge different and especially urgent It examines how green transformations must take place in the context of the particular moments of capitalist development and in relation to particular alliances The role of the state is emphasised both in terms of the type of incentives required to make green transformations politically feasible and the way states must take a developmental role in financing innovation and technology for green transformations The book also highlights the role of citizens as innovators entrepreneurs green consumers and members of social movements Green transformations must be both top down involving elite alliances between states and business but also bottom up pushed by grassroots innovators and entrepreneurs and part of wider mobilisations among civil society The chapters in the book draw on international examples to emphasise how contexts matter in shaping pathways to sustainability Written by experts in the field this book will be of great interest to researchers and students in environmental studies international relations political science development studies geography and anthropology as well as policymakers and practitioners concerned with sustainability

The Qualified Student Harold S. Wechsler,2017-09-29 In *The Qualified Student* Harold S Wechsler focuses on methods of student selection used by institutions of higher education in the

United States More specifically he discusses the way that college and university reformers employed those methods to introduce higher education into a broader cross section of America by extending access to an increased number of students from nontraditional backgrounds Implicit in much of this book is an underlying social and ethical question How legitimate was and is higher education s regulation of social mobility Public concern over colleges and universities practices became inevitable once they became regulators between social classes The challenging of colleges admissions policies in the courts augments similar concerns that have been present in legislatures for decades The volume is divided into three main sections Prerequisites Columbia and the Selective Function and Implications It focuses mainly on four universities The University of Michigan Columbia University the University of Chicago and the City University of New York Wechsler maintains that unlike other universities these institutions were pacesetters they did not adopt a new policy simply because some other college had already adopted it A new introduction brings the book originally published in 1977 up to date and demonstrates its continuing importance in today s academic world of selective admissions
