Activities Paradigm Accelerated Curriculum,2005-01-01 Key topics speed energy force simple machines Laws of Motion heat
pressure density wave motion light electricity circuits current power safety with electricity discovery by design careers in
physics Newton Franklin IPC consists of twelve chapters of text and twelve companion student activity books This course
introduces students to the people places and principles of physics and chemistry It is written by internationally respected
scientist author John Hudson Tiner who applies the vignette approach which effectively draws readers into the text and holds
attention The author and editors have deliberately avoided complex mathematical equations in order to entice students into
high school level science Focus is on the people who contributed to development of the Periodic Table of the Elements
Students learn to read and apply the Table while gaining insight into basic chemistry and physics This is one of our most
popular courses among high school students especially those who have a history of under performance in science courses
due to poor mathematical and reading comprehension skills The course is designed for two high school transcript credits
Teachers may require students to complete all twelve chapters for two transcript credits or may select only six chapters to be
completed for one transcript credit for Physical Science Physics or Chemistry Compliance with state and local academic
essential elements should be considered when specific chapters are selected by teachers As applicable to local policies
transcript credit may be assigned as follows when students complete all 12 chapters Physical Science for one credit and
Chemistry for one credit or Integrated Physics and Chemistry for two credits May require supplemental local classes labs
