Science and Technology Education and Communication Maarten C. A. van der Sanden, Marc J. de Vries, 2016-11-25 Science technology education on the one hand and communication on the other are to a large extent still separate worlds and many

opportunities for synergy and cross fertilisation are yet unused This divide is unfortunate since educators need communication skills and communicators often use aspects of education in their strategies Moreover innovation processes in both domains ask for education and communication insights and skills Therefore scholars and practitioners in both domains must seek connections and synergy by exchanging insights and ideas This book discusses the shared aims of science technology education and communication such as science literacy and engagement as well as common processes and challenges such as social learning social design and professionalisation and assessment Aims processes and challenges that inspire enhance and deepen the education and communication synergy from a theoretical and practical side If one reads the various chapters and reflects on them from one s own perspective as a scholar or practitioner the question is no longer if cross fertilisation and synergy are needed but when are we seriously going to take up this challenge together This book aims to initiate the dialogue that the situation in the development of the topic requires at this point [Resources in Education](#)

Affordability of National Flood Insurance Program Premiums National Academies of Sciences, Engineering, and Medicine,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,Division on Engineering and Physical Sciences,Board on Mathematical Sciences and Their Applications,Division on Earth and Life Studies,Water Science and Technology Board,Committee on Affordability of National Flood Insurance Program Premiums,2016-02-21 When Congress authorized the National Flood Insurance Program NFIP in 1968 it intended for the program to encourage community initiatives in flood risk management charge insurance premiums consistent with actuarial pricing principles and encourage the purchase of flood insurance by owners of flood prone properties in part by offering affordable premiums The

NFIP has been reauthorized many times since 1968 most recently with the Biggert Waters Flood Insurance Reform Act of 2012 BW 2012 In this most recent reauthorization Congress placed a particular emphasis on setting flood insurance premiums following actuarial pricing principles which was motivated by a desire to ensure future revenues were adequate to pay claims and administrative expenses BW 2012 was designed to move the NFIP towards risk based premiums for all flood insurance policies The result was to be increased premiums for some policyholders that had been paying less than NFIP risk based premiums and to possibly increase premiums for all policyholders Recognition of this possibility and concern for the affordability of flood insurance is reflected in sections of the Homeowner Flood Insurance Affordability Act of 2014 HFIAA 2014 These sections called on FEMA to propose a draft affordability framework for the NFIP after completing an analysis of the efforts of possible programs for offering means tested assistance to policyholders for whom higher rates may not be affordable BW 2012 and HFIAA 2014 mandated that FEMA conduct a study in cooperation with the National Academies of Sciences Engineering and Medicine which would compare the costs of a program of risk based rates and means tested assistance to the current system of subsidized flood insurance rates and federally funded disaster relief for people without coverage Production of two reports was agreed upon to fulfill this mandate This second report proposes alternative approaches for a national evaluation of affordability program policy options and includes lessons for the design of a national study from a proof of concept pilot study
