The Cinema and Its Shadow Alice Maurice, 2013-03-15 The Cinema and Its Shadow argues that race has defined the cinematic apparatus since the earliest motion pictures especially at times of technological transition In particular this work explores how racial difference became central to the resolving of cinematic problems the stationary camera narrative form realism the synchronization of image and sound and perhaps most fundamentally the immaterial image the cinema's shadow which figures both the material reality of the screen image and its racist past Discussing early race subjects Alice Maurice demonstrates that these films influenced cinematic narrative in lasting ways by helping to determine the relation between stillness and motion spectacle and narrative drive The book examines how motion picture technology related to race embodiment and authenticity at specific junctures in cinema's development including the advent of narrative feature films and sound In close readings of such films as *The Cheat* *Shadows* and *Hallelujah* Maurice reveals how the rhetoric of race repeatedly embodies film technology endowing it with a powerful mix of authenticity and magic In this way the racialized subject became the perfect medium for showing off shoring up and reintroducing the cinematic apparatus at various points in the history of American film Moving beyond analyzing race in purely thematic or ideological terms Maurice traces how it shaped the formal and technological means of the cinema
