Round all answers to four decimal places (leave in decimal format and not percentage)

San Antonio MultiComm Services (SAMS) provides high quality communications networks in the Greater San Antonio area. SAMS offers subscription-based services for digital cable video programming, local and long-distance telephone services and high speed internet access. Recently, SAMS is facing competition from other network providers that have expanded in the San Antonio Area.

SAMS marketing department wants to increase subscriptions for its Three-For-All telephone, cable, and Internet combined services. SAMS marketing has been conducting an aggressive direct-marketing campaign that includes postal and electronic mailings and telephone solicitations. Feedback from these efforts indicates that including premium channels in this combined service is a very important factor for both current and prospective subscribers. After several brainstorming sessions, the marketing department has decided to add premium cable channels as a no-cost benefit of subscribing to the Three-For-All service.

You plan to conduct a survey among prospective customers to determine how many premium channels need to be added to the Three-For-All service in order to generate a subscription to the service. Based on past campaigns and on industry-wide data, you estimate the following.

Number of Free Premium Channels	Probability of Subscriptions
0	0.02
1	0.04
2	0.06
3	0.07
4	0.08
5	0.085

Questions 1, 2 & 3 Hint Distribution: They subscribe or they don't

1. If a sample of 50 prospective customers is selected and no free premium channels are included in the Three-For-All service offer, what is the probability that fewer than 3 customers will subscribe? What is the probability that more than 4 customers will subscribe?
2. Instead of offering no premium free channels, suppose that two free premium channels are included. What is the probability that fewer than 3 customers will subscribe? What is the probability that more than 4 customers will subscribe?
3. Compare your answers from questions #1 and #2 and interpret the meaning of the results.

web jul 24 2023 this book covers all aspects of inertial navigation systems including the sensor technology and the estimation of instrument errors as well as their integration with the global positioning system gps for geodetic applications

inertial navigation systems with geodetic applications - Apr 26 2023

web this book covers all aspects of inertial navigation systems including the sensor technology and the estimation of instrument errors as well as their integration with the global

inertial navigation systems with geodetic applications - Nov 21 2022

web publisher's summary this text covers all aspects of inertial navigation systems including the sensor technology and the estimation of instrument errors as well as their integration with the global positioning system gps for geodetic applications

inertial navigation system an overview sciencedirect topics - Apr 14 2022

web inertial navigation systems are navigational systems capable of calculating position either relative to some reference system point or to absolute coordinates an ins system is composed of at least three gyros and three accelerometers enabling the system to derive a navigation solution

inertial navigation systems with geodetic applications jekeli - Mar 14 2022

web inertial navigation systems with geodetic applications by jekeli christopher isbn 10 3110159031 isbn 13 9783110159035 de gruyter 2000 hardcover

inertial navigation systems with geodetic applications de gruyter - Aug 31 2023

web oct 25 2012 about this book this book covers all aspects of inertial navigation systems including the sensor technology and the estimation of instrument errors as well as their integration with the global positioning system gps for geodetic applications complete mathematical derivations are given

inertial navigation systems with geodetic applications 2nd - Jan 12 2022

web jul 29 2023 this book covers all aspects of inertial navigation systems including the sensor technology and the estimation of instrument errors as well as their integration with global navigation satellite systems specifically the global positioning system gps for geodetic applications the text is of interest to geodesists including surveyors
