On the transformation side it supports the definition of unidirectional model to model transformations of in place transformations it supports defining bidirectional transformations and it supports a new kind of co evolution transformations that allow for evolving a model together with its metamodel simultaneously Several properties make FunnyQT unique Foremost it is just a Clojure library thus FunnyQT queries and transformations are Clojure programs However most higher level services are provided as task oriented embedded DSLs which use Clojure s powerful macro system to support the user with tailor made language constructs important for the task at hand Since queries and transformations are just Clojure programs they may use any Clojure or Java library for their own purpose e g they may use some templating library for defining model to text transformations Conversely like every Clojure program FunnyQT queries and transformations compile to normal JVM byte code and can easily be called from other JVM languages Furthermore FunnyQT is platform independent and designed with extensibility in mind By default it supports the Eclipse Modeling Framework and JGraLab and support for other modeling frameworks can be added with minimal effort and without having to modify the respective framework s classes or FunnyQT itself Lastly because FunnyQT is embedded in a functional language it has a functional emphasis itself Every query and every transformation compiles to a function which can be passed around given to higher order functions or be parametrized with other functions

Orthodox Christian Material Culture Timothy Carroll,2018-05-15 Although much has been written on the making of art objects as a means of engaging in creative productions of the self most famously Alfred Gell s work there has been very little written on Orthodox Christianity and its use of material within religious self formation Eastern Orthodox Christianity is renowned for its artistry and the aesthetics of its worship being an integral part of devout practice Yet this is an area with little ethnographic exploration available and even scarcer ethnographic attention given to the material culture of Eastern Christianity outside the traditional homelands of the greater Levant and Eastern Europe Drawing from and building upon Gell s work Carroll explores the uses and purposes of material culture in Eastern Orthodox Christian worship Drawing on three years of ethnographic fieldwork in a small Antiochian Orthodox parish in London Carroll focusses on a study of ecclesiastical fabric but places this within the wider context of Orthodox material ecology in Britain This ethnographic exploration leads to discussion of the role of materials in the construction of religious identity material understandings of religion and pathways of pilgrimatic engagement and religious movement across Europe In a religious tradition characterised by repetition and continuity but also as sensuously tactile this book argues that material objects are necessary for the continual production of Orthodox Christians as art like subjects It is an important contribution to the corpus of literature on the anthropology of material culture and art and the anthropology of religion
