

CONTENTS:

- Kinematics + forces
- Newton's Laws
- Gravitation and Electric fields
- Electric circuits
- Electrodynamics

KINEMATICS:

mechanics: Branch of physical science that deals with energy and forces and their effect on bodies.

vector: Physical quantity that has both magnitude and direction

Resultant vector: Single vector that has same effect on a body as original vectors acting together.

tail-to-head: Method of graphically finding resultant vector.

— Resultant of 2 perpendicular forces:

- tail-to-head

$$F_{\text{net}}^2 = F_1^2 + F_2^2$$

$$F_{\text{net}}^2 = 0.43^2 + 2.1^2$$

$$F_{\text{net}}^2 = 4.59$$

$$F_{\text{net}} = 2.14\text{N}$$

— Resultant of more than 2 perpendicular forces:

- add & subtract vertical and horizontal forces to end up with one vertical and one horizontal force
- Then do tail-to-head method

$$\sin 42^\circ = \frac{F_{\text{hor}}}{F}$$

$$F_{\text{hor}} = 4.82$$

$$\cos 42^\circ = \frac{F_{\text{vert}}}{F}$$

$$F_{\text{vert}} = 5.35\text{N}$$

Physical Science Paper Topics:

Uncovering Student Ideas in Physical Science, Volume 1 Page D. Keeley, Rand Harrington, 2010-05-15 This is a must have book if you are going to tackle the challenging concepts of force and motion in your classroom *Physical Science* Mr. Rohit Manglik, 2024-07-15 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels

Critical Appraisal of Physical Science as a Human Enterprise Mansoor Niaz, 2009-02-07 It is generally believed that doing science means accumulating empirical data with no or little reference to the interpretation of the data based on the scientific methodical framework or presuppositions Holton 1969a has deplored the widely accepted myth of experimentalism according to which progress in science is presented as the inexorable result of the pursuit of logically sound conclusions from unambiguous experimental data Surprisingly some of the leading scientists themselves Millikan is a good example have contributed to perpetuate the myth with respect to modern science being essentially empirical that is carefully tested experimental facts free of a priori conceptions leading to inductive generalizations Based on the existing knowledge in a field of research a scientist formulates the guiding assumptions Laudan et al 1988 presuppositions Holton 1978 1998 and hard core Lakatos 1970 of the research program that constitutes the imperative of presuppositions which is not abandoned in the face of anomalous data Laudan and his group consider the following paraphrase of Kant by Lakatos as an important guideline philosophy of science without history of science is empty Starting in the 1960s this historical school has attempted to redraw and replace the positivist or logical empiricist image of science that dominated for the first half of the twentieth century Among other aspects one that looms large in these studies is that of guiding assumptions and has considerable implications for the main thesis of this monograph Chapter 2 *Resources in Education*, 2000-10 *The Chemical News and Journal of Physical Science*, 1906 **Report** Calcutta (India) University commission. 1917-1919, 1919 **Report** Calcutta University Commission, 1919
