Imperatives for Legal Education Research Ben Golder, Marina Nehme, Alex Steel, Prue Vines, 2019-08-28 In the last few decades university teaching has been recognised as an activity which can be studied and improved through educational scholarship In some disciplines this is now well established It remains emergent in legal education The field is rich with questions to be answered issues to be raised This book provides the first overall review of legal education scholarship The chapters outline the history of legal education research and provide a detailed analysis of the trends in areas of publication Beyond this the book suggests a typology for further conceptualising the field and a series of suggested paths for future research The book originated from the 2017 UNSW conference Research in Legal Education State of the Art It features internationally respected authors who bring their perspectives on how legal education as a field of research should be conceptualised The collection is arranged into three themes First a historical view is taken of the emergence of legal education scholarship and its roots that predate modern educational theory Secondly the book provides overviews of the extant field of publications highlighting areas of interest and neglect and delineating the trends in current publication Thirdly the book provides a set of suggested typologies for describing legal education research and a series of essays for future directions which both critique current approaches and provide inspiration for future directions The State of Legal Education Research represents an authoritative introduction to the field a set of conceptual tools with which to describe it and inspiration for researchers to expand and grow research into legal education

Precision medicine approaches for heterogeneous conditions such as autism spectrum disorders (The need for a biomarker exploration phase in clinical trials - Phase 2m) David Quentin Beversdorf, Craig Andrew Erickson, Paul Wang, Thomas Frazier, 2023-04-17 Many therapeutic interventions for autism spectrum disorder fail when they are examined in a clinical trial Frequently there is a subset of patients that responds very well to the intervention while others do not and the overall result does not yield a positive result As autism spectrum disorder is highly heterogeneous in its underlying genetics and other etiological risk factors as well as its heterogeneous phenotypic manifestation this variability in response to any specific treatment is not entirely surprising However it remains a challenge to meaningfully subtype this heterogeneity for targeted treatment The purpose of this research topic is to solicit articles that address the heterogeneity in autism spectrum disorder in a manner that may meaningfully contribute to targeted treatment approaches Studies that address the heterogeneity of autism that could theoretically lead to targeted treatment and studies that more directly address the use of a marker in association with response to a treatment are both aspects that will contribute to this purpose It is hoped that this Research Topic will yield

articles that can help advance the field towards precision medicine in autism spectrum disorders Manuscripts that contribute to the specification of the heterogeneity of autism spectrum disorder in a manner that could theoretically lead to targeted treatment would be appropriate for this research topic Additionally articles that utilize subtyping in relation to response to treatment would be appropriate for this research topic *The Ecology & Environment Compendium for IAS Prelims General Studies CSAT Paper 1, UPSC & State PSC* Disha Experts,2017-07-13 The Ecology Environment Compendium is the Most Updated Material for Ecology covering the social political and economic aspects of Climate Change Sustainable Development and Environmental Management The emphasis of the book has been on Policies Summits Reports Initiatives new terms Judgements etc which are important from the point of view of the exam The book captures most of the important questions with explanations of the past years of the IAS Prelim exam CDS NDA and other competitive exams distributed in the various chapters The book is divided into 9 chapters followed by 2 levels of exercises with 700 Simple MCQs statement based MCQs
