

Piecewise Graphing Project

For this project you will create a piecewise graph of a logo or picture of your choice. I have included some examples to help jumpstart your thinking. Visit [desmos.com](https://www.desmos.com) for more!

Although your graph needs to meet certain criteria, I want you to have fun with this project!! We will be spending a day in the computer lab for you to finalize your masterpiece. **It is imperative that your preliminary work be done by April 30.**

Included are two blank pages of graph paper for you to begin sketching ideas and brainstorming. The sky is the limit!

*Word to the wise: keep track of the equations you create as you go.

Cellular Topology Vladimir Kovalevsky, 2022-03-26 This book explains why the finite topological space known as abstract cell complex is important for successful image processing and presents image processing methods based on abstract cell complex especially for tracing and encoding of boundaries of homogeneous regions Many examples are provided in the book some teach you how to trace and encode boundaries in binary indexed and colour images Other examples explain how to encode a boundary as a sequence of straight line segments which is important for shape recognition A new method of edge detection in two and three dimensional images is suggested Also a discussion problem is included in the book A derivative is defined as the limit of the relation of the increment of the function to the increment of the argument as the latter tends to zero Is it not better to estimate derivatives as the relation of the increment of the function to the optimal increment of the argument instead of taking exceedingly small increment which leads to errors This book addresses all above questions and provide the answers
