Gravity's Century Ron Cowen, 2019-05-06 This gracefully written history of twentieth century gravity research brings to life the discoveries and developments that confirmed the theory of relativity Publishers Weekly starred review Albert Einstein did nothing of note on May 29 1919 yet that is when he became immortal On that day astronomer Arthur Eddington and his team observed a solar eclipse and found something extraordinary gravity bends light just as Einstein predicted The finding confirmed the theory of general relativity fundamentally changing our understanding of space and time A century later the Event Horizon Telescope

examined the space surrounding Sagittarius A the supermassive black hole at the center of the Milky Way to determine whether Einstein was right on the details In Gravity's Century award winning science writer Ron Cowen brings to life the incredible scientific journey between these two events and sheds light on their groundbreaking implications From the development of radio telescopes to the discovery of black holes and quasars and the still unresolved place of gravity in quantum theory Cowen breaks down the physics in clear and approachable language Gravity's Century vividly demonstrates how the quest to understand gravity is really the quest to comprehend the universe
