

The Harley Davidson Motorcycle History

After drawing up plans for a small engine designed to fit on a regular bike frame, William S. Harley worked with Arthur and Walter Davidson to build this "motor-bicycle." They finished the first model in 1903. While the test was mostly successful, the bike was unable to climb hills without the rider providing pedaling assistance.

But Harley and the Davidson brothers did not give up. They immediately began working on a new and improved machine. They created a bigger engine and loop-frame design. After completing the prototype in 1904, they entered the bike into a local motorcycle race at the State Fair Park, where it placed fourth.

Now that they had a working model, bare Harley-Davidson engines were listed in the January 1905 Automobile and Cycle Trade Journal. Just four months later, the motorcycles were in production. That first year, five bikes were produced – three of which were sold by the first Harley-Davidson dealer, Carl H. Lang of Chicago.

By 1906, Harley and the Davidson brothers were moving out of their shed and into their first factory, which was located at the current site of Harley-Davidson

The Lama Question Christopher Kaplonski,2014-11-30 Before becoming the second socialist country in the world after the Soviet Union in 1921 Mongolia had been a Buddhist feudal theocracy Combatting the influence of the dominant Buddhist establishment to win the hearts and minds of the Mongolian people was one of the most important challenges faced by the new socialist government It would take almost a decade and a half to resolve the lama question and it would be answered with brutality destruction and mass killings Chris Kaplonski examines this critical violent time in the development of Mongolia as a nation state and its ongoing struggle for independence and recognition in the twentieth century Unlike most studies that explore violence as the primary means by which states deal with their opponents The Lama Question argues that the decision to resort to violence in Mongolia was not a quick one neither was it a long term strategy nor an out of control escalation of orders but the outcome of a complex series of events and attempts by the government to be viewed as legitimate by the population Kaplonski draws on a decade of research and archival resources to investigate the problematic relationships between religion and politics and geopolitics and biopolitics in early socialist Mongolia as well as the multitude of state actions that preceded state brutality By examining the incidents and transformations that resulted in violence and by viewing violence as a process rather than an event his work not only challenges existing theories of political violence but also offers another approach to the anthropology of the state In particular it presents an alternative model to philosopher Giorgio Agamben s theory of sovereignty and the state of exception The Lama Question will be of interest to scholars and students of violence the state biopolitics Buddhism and socialism as well as to those interested in the history of Mongolia and Asia in general
