Remapping Africa in the Global Space Edward Shizha, 2014-11-26 What are the benefits and risks for Africa's participation in the globalisation nexus Remapping Africa in the Global Space is a visionary and interdisciplinary volume that

restores Africa's image using a multidisciplinary lens. It incorporates disciplines such as sociology, education, global studies, economics, development studies, political science, and philosophy to explore and theorise Africa's reality in the global space and to deconstruct the misperceptions and narratives that often infantilise Africa's internal and international relations. The contributions to this volume are a hybrid of both outsider and insider perspectives that create a balanced critical discourse that can provide standard paradigms that can adequately explain, predict or prevent Africa's current misperceptions and myths about the African crisis and failure status. The authors provide a holistic and perhaps anticolonial and anti-hegemonic perspective that can benefit a wide spectrum of academics, scholars, students, development agents, policy makers in both governmental and non-governmental organisations and engage some alternative analyses and possibilities for socio-political and economic advancement in Africa. The book provides up-to-date scholarly research on continental trends on various subjects and concerns of paramount importance to globalisation and development in Africa. The book is brilliant. *Remapping Africa in the Global Space: Propositions for Change* explores Africa from the perspective of academics specialised in subject matters pertaining to the continent. In this age of globalisation, I find this book invaluable. It is a good read as it dissects analyses and presents issues affecting the continent in an articulate and cogent way. I highly recommend its use in academic institutions. Magnus Mfofo M. Carthy, Assistant Professor, Lyle S. Hallman, Faculty of Social Work, Fellow of Tshepo Institute for the Study of Contemporary Africa, Wilfrid Laurier University, Kitchener, Canada. More than anything else, *Remapping Africa in the Global Space: Propositions for Change* speaks to the complex, multifaceted and interfused character of the development challenges and prospects of Africa. Indeed, few books have examined contemporary Africa as comprehensively and insightfully as this edited volume. It is widely welcomed in the African academic, scholarly and research arena. Joseph Mensah, Professor of Geography, York University, Toronto. **Science Education and Curriculum in South Africa** Oscar Koopman, 2016-11-01

This book explores the impact of the socio-historical, political and economic environment in South Africa both during and after Apartheid. During this time, the South African education system demonstrated an interest in a specific type of knowledge which Koopman refers to as a science of government. This science of government leaves the learners with a blurred understanding of science that is disconnected from external nature and human nature and is presented as a series of abstract concepts and definitions. The book also investigates the dialectical tensions between the science curriculum and the role of the teacher as an active implementer of the curriculum. The book draws on the work of various phenomenological scholars, namely Edmund Husserl, Martin Heidegger, Merleau-Ponty and Max van Manen to discuss these tensions. [Resurgence and Revalorization of Indigenous Knowledge Systems in the Contemporary Society](#) Masenya, Tlou, Maggie, Bhuda, Monicca Thulisile, 2025-05-08. Indigenous knowledge is the comprehensive body of knowledge that locals accumulate from life experience, unofficial research and close observation of their surroundings within a particular culture. It connects the entirety of nature and the components that sustain life to the survival of every human being. Additionally, it gives specific community

conditions in respect to the environment and offers workable answers to people's problems. As a result, by preserving indigenous knowledge systems, indigenous knowledge may provide value to the community by offering innovative solutions to social, environmental, and economic issues.

Resurgence and Revalorization of Indigenous Knowledge Systems in the Contemporary Society explores the role of indigenous knowledge in the contemporary society. Furthermore, it discusses the importance of preserving and sharing indigenous knowledge for community development. Covering topics such as epistemic diversity, traditional load, and indigenous curricula, this book is an excellent resource for sociologists, policymakers, government officials, environmentalists, educators, records managers, professionals, researchers, scholars, academicians, and more.

Social Justice and Transformative Learning Sandra M. Tomlinson-Clarke, Darren L. Clarke, 2016-03-10

The similarities between the United States and South Africa with respect to race, power, oppression, and economic inequities are striking, and a better understanding of these parallels can provide educational gains for students and educators in both countries. Through shared experiences and perspectives, this volume presents scholarly work from U.S. and South African scholars that advance educational practice in support of social justice and transformative learning. It provides a comprehensive framework for developing transformational learning experiences that facilitates leadership for social justice and a deeper understanding of the factors influencing personal, national, and global identity.
