Bureau of the Budget, 1954 Educational Assessment in a Time of Reform Coert Loock, Vanessa Scherman, 2019-11-20

Educational Assessment in a Time of Reform provides background information on large scale examination systems more generally and the South African examination specifically. It traces the reforms in the education system of South Africa since 1994 and provides a description of the advances in modern test theory that could be considered for future standard setting endeavours. At the heart of the book is the debate on whether the current standard of education in Africa is good enough. If not, then how can it be improved? The aim of this book is to provide a point of departure for discussions on standard setting, quality assurance, equating of examinations and assessment approaches. From this point of departure, recommendations for practices in general and the exit level Grade 12 examination results in particular can be made. This book is ideal reading for principals, teachers, academics and researchers in the fields of educational assessment, measurement and evaluation.

Marking Matric Vijay Reddy, 2006. The past ten years in South Africa has seen many changes in education: the creation of a single department of education, common examinations for all learners in public schools in the country, a new outcomes-based education curriculum which was introduced to learners in the general education and training phase since 1998 and will be introduced to the further education and training phase from 2006. To evaluate the success of these changes, South African researchers still use the indicator of student achievement. The matriculation examination is the visible, high profile and public performance indicator. Every year, parents, learners, teachers, researchers, government officials, policymakers and the general public get involved in the debate around the matric examination, with the most frequently asked questions being: Did the pass rate go up? Are standards dropping? Are the results real or have they been manipulated? How is our education system doing? Are we meeting the development goals? What should the matriculation examination of the future look like?
