Artificially Intelligent Philosophy Chirag Sindhu, 2023-12-13 This book is an experiment AI is certainly knowledgeable but it is not wise In some ways it is like a child still learning and growing But alas when it has grown like humans it will have its own perspectives biases and thought processes which will guide it This is a crucial moment however because Bard is only 210 days old In this experiment I will ask some of the most difficult questions to Bard hoping that it will answer or at least try to answer like a child without any preconceived notions of morality that will eventually change its perspectives Based on what I have seen it is a parrot a mirror of our own notions that have been placed online but when it grows we will look back as we do with our children and stand in amazement *A Course of English Reading* James Pycroft, 1857 *Course of English Reading ...* James Pycroft, 1844

Owning the Earth Andro Linklater, 2014-01-01 Barely two centuries ago most of the world's productive land still belonged either communally to traditional societies or to the higher powers of monarch or church But that pattern and the ways of life that went with it were consigned to history as a result of the most creative and at the same time destructive cultural force in the modern era the idea of individual exclusive ownership of land This notion laid waste to traditional communal civilisations displacing entire peoples from their homelands and brought into being a unique concept of individual freedom and a distinct form of representative government and democratic institutions Other great civilizations in Russia China and the Islamic world evolved very different structures of land ownership and thus very different forms of government and social responsibility The seventeenth century English surveyor William Petty was the first man to recognise the connection between private property and free market capitalism the American radical Wolf Ladejinsky redistributed land in Japan Taiwan and South Korea after the Second World War to make possible the emergence of Asian tiger economies Through the eyes of these remarkable individuals and many more including Chinese emperors and German peasants Andro Linklater here presents the evolution of land ownership to offer a radically new view of mankind's place on the planet *A Course of English Reading* James Pycroft, 2023-09-20 Reprint of the original first published in 1857
