[Power Strategy in Asia](#) Jonathan Bailey, 2006-11-22 This book analyzes the enduring themes underlying the strategic struggles of the great powers in East Asia beginning with the watershed event of the 1904-5 Russo Japanese War **The Dramatic Diplomacy of Internationals: Power, Strategy, and Conflict in the 21st Century (2020-2025)** KHRITISH SWARGIARY, 2025-05-08 The past half decade has borne witness to an unprecedented reshaping of global diplomacy From the corridors of Washington and Beijing to the contested straits of the South China Sea from the digital marketplaces of New Delhi to the energy pipelines feeding Europe states have leveraged every tool at their disposal economic military technological and normative to advance their national interests When I embarked on this project in early 2024 it was clear that the period 2020-2025 would prove pivotal shifting alliances emergent crises and accelerating technological change have combined to redraw the strategic map This book **The Dramatic Diplomacy of Internationals Power Strategy and Conflict in the 21st Century 2020-2025** seeks to provide both a panoramic overview and a finely grained analysis of how the world s ten most powerful nations have navigated this turbulent era Drawing on official communiqués first hand interviews with diplomats and defense planners detailed trade and investment data and contemporaneous case studies I have endeavored to chart the evolving strategies of the United States China Russia India Germany France Japan Brazil Saudi Arabia and Turkey Each chapter balances rigorous data with narrative storytelling revealing not only what decisions were made but how and why they emerged from the interplay of domestic politics regional dynamics and global imperatives In Chapter 1 we trace America s turn from the unilateralism of the late 2010s toward a more adaptive realism one that marries selective restraint with technological competition and calibrated alliance building Chapter 2 examines China s ascent in the realm of techno diplomacy where infrastructure financing digital surveillance exports and wolf warrior rhetoric coexist with an ambitious climate agenda Chapter 3 delves into Russia s hybrid toolkit energy coercion cyber proxy warfare and Arctic militarization capped by case studies of its advances in Ukraine Chapter 4 explores the European Union s struggle for strategic autonomy

amidst transatlantic strains green diplomacy and migration pressures Chapter 5 spotlights the ascending roles of India Brazil and Turkey three nations forging new paradigms of digital governance environmental stewardship and regional mediation In Chapter 6 we map the shifting rivalries of the Middle East from the fleeting Iran Saudi rapprochement to Jordan's deft peacemaking in Gaza Chapter 7 turns to Africa where the African Union's campaign for Security Council reform and the Wagner Group's mercenary ventures underscore the continent's critical stakes in great power competition The Conclusion synthesizes these threads arguing that successful diplomacy in our polycrisis age demands a blend of nimble technology adoption networked partnerships and at times even contrarian realpolitik I am deeply grateful to the many researchers regional specialists and diplomatic interlocutors who granted their time and insights My thanks also go to the institutions that provided access to archival materials and field level data Above all I hope this work serves as a guide for policymakers scholars and informed citizens alike illuminating the dramatic interplay of power and principle that shapes our shared future

Military Strategy of Great Powers Håkan Edström, Jacob Westberg, 2021-09-20 This book explores the military strategies of the five system determining great powers during the twenty first century The book s point of departure is that analyses of countries defence strategies should acknowledge that states come in various shapes and sizes and that their strategic choices are affected by their perceptions of their position in the international system and by power asymmetries between more and less resourceful states This creates a diversity in strategies that is often overlooked in theoretically oriented analyses The book examines how five major powers the United States China the United Kingdom France and Russia have adjusted their strategies to improve or maintain their relative position and to manage power asymmetries during the twenty first century It also develops and applies an analytical framework for exploring and categorising the strategies pursued by the five major powers which combines elements of structural realism with research on power transition theory and status competition The concluding chapter addresses questions related to stability and change in the present international system This book will be of interest to students of strategic studies foreign policy and International Relations
