 presents a critical startling and expansive journey into the mysteries of the brain and what makes us human What if our
 soundest most reasonable judgments are beyond our control Despite 2500 years of contemplation by the world s greatest
 minds and the more recent phenomenal advances in basic neuroscience neither neuroscientists nor philosophers have a
 decent understanding of what the mind is or how it works The gap between what the brain does and the mind experiences
 remains uncharted territory Nevertheless with powerful new tools such as the fMRI scan neuroscience has become the de

 that while some neuroscience observations are real advances others are overreaching unwarranted wrong headed self
