OEC's latest digital mobile C-arm technology uses the patented "no image" or Motion-Independent Imageless technique that allows the user to perform OEC's Digital Subtraction Angiography (DSA) imaging while moving the C-arm in systems. This allows more imaging coupled with our unique Motion-Independent Imaging technology where motion imaging is now possible with improved productivity. Achieve the same benefits of subtraction without all the fuss.

OEC's advanced image processing performs faster than the most advanced and applies specific processing algorithms to effectively "denoise" the image, resulting in a better view of the vessel lumen when you need it.

The advanced OEC technology processes each imaging profile uniquely to highlight the anatomy of interest. Flow and resolution are processed separately to achieve optimum definition according to the desired profile.

The complete image quality and resolution enhancement is only achieved by the unique imaging profile for a specific application. Image. Camera. Focus.
