

EXPERIMENT: Mechanics and Measurement

HYPOTHESIS: If the number of paper clips increase, so will the time period for an oscillation will increase.

AIM: To determine the number of paperclips

THEORY: Theory: A simple pendulum is made of a string of length l and a bob of mass m , is released from a small angle θ_0 . It strikes a block of mass M , kept on a horizontal surface at its lowest point of oscillations. The bob, which is suspended from a fixed point by a string or rod when displaced and released, it swings back and forth under the influence of gravity. The motion is approximately simple harmonic when the amplitude is small.

The period of a simple pendulum is the time it takes for the pendulum to complete one full swing back and forth. The period can be calculated using the formula:

$T = 2\pi\sqrt{L/g}$ Mathematically, this relationship can be expressed as $T \propto \sqrt{L}$. To remove the proportionality symbol and introduce a constant of proportionality(K), we square both sides of the equation, resulting in $T^2 \propto L$. By doing this, we can establish the relationship that the period(T) squared is directly proportional to the length(N). Where L is the number/ length of paperclips

Rare Earth Frontiers Julie M. Klinger, 2018-01-15 Rare Earth Frontiers is a work of human geography that serves to demystify the powerful elements that make possible the miniaturization of electronics green energy and medical technologies and essential telecommunications and defense systems Julie Michelle Klinger draws attention to the fact that the rare earths we rely on most are as common as copper or lead and this means the implications of their extraction are global Klinger excavates the rich historical origins and ongoing ramifications of the quest to mine rare earths in ever more impossible

places Klinger writes about the devastating damage to lives and the environment caused by the exploitation of rare earths. She demonstrates in human terms how scarcity myths have been conscripted into diverse geopolitical campaigns that use rare earth mining as a pretext to capture spaces that have historically fallen beyond the grasp of centralized power. These include legally and logistically forbidding locations in the Amazon, Greenland, and Afghanistan, and on the Moon. Drawing on ethnographic archival and interview data gathered in local languages and offering possible solutions to the problems it documents, this book examines the production of the rare earth frontier as a place, a concept, and a zone of contestation, sacrifice, and transformation. *House Documents, Otherwise Publ. as Executive Documents* United States. Edwards, 2019-10-17 *Black Girls Experiencing Their Intersectional Identities in School* explores the subjective experience of Black girls within the educational context. Based on interviews, diary entries, and focus groups, the author argues that as a result of their intersectional identities, Black girls experience unique challenges and obstacles in the educational setting. Addressing topics ranging from interpersonal relationships, social media, beauty, sexuality, hypervisibility, invisibility, and microaggressions, this book highlights the voices and experiences of Black girls between the ages of 11 and 15. The girls provide a narrative account of the challenges they face daily in the educational context, describing in detail the factors that maintain and perpetuate volatile conditions. Additionally, this book explores the coping strategies that this group of Black girls developed to resist and respond to the daily obstacles. Ultimately, this book not only identifies the unique struggles faced by Black girls in schools as a result of their intersectional identities but most importantly, this work explores pragmatic strategies that can be implemented to create safe and beneficial spaces for Black girls. The author argues that through the implementation of Black Feminist Pedagogy, an Ethic of Caring, and partnerships with Black Girl Empowerment organizations, educational practitioners can mediate the negative experiences and create spaces for growth. *Report of the Federal Security Agency* United States.
