Decentralisation and Regional Development Eva Dick, Karin Gaesing, Daniel Inkoom, Teodoro Kausel, 2016-06-15 This book analyzes decentralisation regional development paths and success factors in different governance sectors in Ghana the Philippines Tanzania and Chile and discuss overarching aspects of relevance

Decentralisation which refers to the delegation of administrative responsibilities political decision making and fiscal powers to lower levels of government is now considered one of the most efficient engines of development In Sub Saharan Africa decentralised states have made more progress in reducing poverty than those states with lower decentralisation scores But in many countries decentralisation is still considered a work in progress with unsatisfactory results From a spatial point of view the link between decentralisation and regional and district development is particularly interesting Both in the North and in the South regional or district development is seen as holding the potential for advancing social and economic development and even more so in decentralised political settings Space based networks at the regional or district level are considered instrumental for responding to locally specific challenges e g in areas lagging behind economically

The conference will be held every year to make it an ideal platform for people to share views and experiences in energy equipment science and engineering and related areas.

**Landscapes and Landforms of Eastern Canada** Olav Slaymaker, Norm Catto, 2020-02-13 This critical book focuses on the geomorphological landscapes of eastern Canada and provides a companion volume to *Landscapes and Landforms of Western Canada* (2017). There are a number of unique characteristics of eastern Canada's landscapes, notably its magnificent coastlines, the extraordinary variety and extent of wetlands, the huge Great Lakes-St. Lawrence basin, the high incidence of meteorite craters, the spectacular Niagara Falls, urban karst in Montreal and Ottawa, youthful glaciated karst in Ontario, Newfoundland, Quebec, and Nova Scotia, the ubiquitous permafrost terrain of Nunavut, Labrador, and northern Quebec, and the magnificent arctic fjords and glaciers. Looking at coastlines, the tidal extremes of the Bay of Fundy are world renowned, the structural complexity of the island of Newfoundland is less well known but produces an astounding variety of coastlines in close succession, the arctic fjordlands of Baffin and Ellesmere islands, and the extravagant raised beaches of Hudson Bay bear comparison with the classic fjords of Norway and the Baltic Sea raised beaches. As for wetlands, there are distinctive Arctic, Subarctic, Boreal, Eastern Temperate, and Atlantic wetlands, and their extent is second only to those of Russia. In the Hudson and James Bay regions, between 75% and 100% of the terrestrial surface is comprised of wetlands. One of North America's largest river basins, the Great Lakes-St. Lawrence basin, has its source in Minnesota, straddles the USA-Canada border, and debouches into Quebec as the St. Lawrence River and evolves through its estuary into the Gulf of St. Lawrence, a journey of almost 5,000 km. As far as meteorite

craters are concerned 10% of the world's total are located in eastern Canada including some of the largest and most complex landforms. They are preserved preferentially in the ancient Shield terrain of Quebec. Finally the three million km<sup>2</sup> of permafrost controlled relief in eastern Canada serves as a reminder of the vulnerability of eastern Canada's landscapes to climate change. Effects of warming are expressed through thawing of the permafrost, disruption of transportation corridors and urban construction problems, ever present geomorphic hazards.

**Before Canada** Allan Greer, 2024-07-12 Long before Confederation created a nation state in northern North America Indigenous people were establishing vast networks and trade routes. Volcanic eruptions pushed the ancestors of the Dene to undertake a trek from the present day Northwest Territories to Arizona. Inuit migrated across the Arctic from Siberia reaching Southern Labrador where they met Basque fishers from northern Spain. As early as the fifteenth century fishing ships from western Europe were coming to Newfoundland for cod creating the greatest transatlantic maritime link in the early modern world. Later fur traders would take capitalism across the continent using cheap rum to lubricate their transactions. The contributors to *Before Canada* reveal the latest findings of archaeological and historical research on this fascinating period. Along the way they reframe the story of the Canadian past extending its limits across time and space and challenging us to reconsider our assumptions about this supposedly young country. Innovative and multidisciplinary *Before Canada* inspires interest in the deep history of northern North America.

**Domestic Violence in International Context** Diana Scharff Peterson, Julie Schroeder, 2016-12-19 Domestic violence does not discriminate and is prevalent throughout the world regardless of race, age or socio-economic status. Why then do reactions and response differ so widely throughout the world? While some countries work diligently to address the matter through prevention and training others take a hands-off approach in their response. This book is one of the first to investigate domestic violence on a global scale and provides best practices gleaned from various countries around the world to paint a detailed picture of how police response to domestic violence is currently being conducted and provide training bodies with up-to-date information to enhance current curricula. *Domestic Violence in International Context* brings together expert scholars native to twelve different countries to examine the history and scope of domestic violence and how it is being addressed, repressed or ignored in their thirteen respective countries. Their specialised knowledge and unique data come together to create a series of snapshots that will guide nations, societies and communities worldwide in formulating effective strategies to prevent, intervene and combat this epidemic and examine partnerships and programmes already in place. This book is essential reading for practitioners, policy makers and human rights organisations as well as students and scholars of criminology, social work, sociology and law.
