I have always been fascinated by carnival rides. It amazes me that average, ordinary people eagerly trade in the serenity of the ground for the chance to be tossed through the air like vegetables in a food processor. It amazes me that at some time in history someone thought that people would enjoy this, and that person invented what must have been the first of these terrifying machines. For me, it is precisely the thrill and excitement of having survived the ride that keeps me coming back for more.

My first experience with a carnival ride was a Ferris wheel at a local fair. Looking at that looming monstrosity spinning the life out of its sardine-caged occupants, I was dumbstruck. It was huge, smoky, noisy and not a little intimidating. Ever since that initial impression became fossilized in my imagination many years ago, these rides have reminded me of mythical beasts, amazing dinosaurs carrying off their screaming passengers like sacrificial virgins. Even the droning sound of their engines brings to mind the great roar of a fire-breathing dragon with smoke spewing from its exhaust-pipe nostrils.

The first ride on one of these fantastic beasts gave me an instant rush of adrenaline. As the death-defying ride started, a lump in my throat pulsed like a dislodged heart ready to walk the plank. As the ride gained speed, the resistance to gravity built up against my body until I was unable to move. An almost imperceptible pause as the wheel reached the top of its climb allowed my body to relax in a brief state of normalcy. Then there was an assault of stomach-turning weightlessness as the machine continued its rotation and I descended back toward the earth. A cymbal-like crash vibrated through the air as the wheel reached bottom, and much to my surprise I began to rise again.
