Visser integrating insights from care studies this book offers a comprehensive approach to understanding care across various fields. It bridges the gap between research methodology and professional and personal realities and concerns of care. Readers will benefit from insights derived from care ethics and theory which highlight relationality, shared responsibility, intersubjectivity and vulnerability in dynamic interactions within care settings extending beyond healthcare altogether. This practical approach offers an inclusive and adaptable understanding of care case studies. Here care is broadly defined as encompassing all that is done to enhance personal and other well-being including shared responsibilities, responsiveness to evolving needs and the ongoing negotiation of optimal solutions. Step by step this book guides both novice and experienced researchers in prioritizing issues and concerns, context-specific details, relationships, the richness of lived experiences and personal narratives when studying and advancing care. It provides insights into the strengths of case studies in learning about care and supports a more nuanced responsive approach to research in everyday ordinary practices.
