Broadcasting the Faith Michael E. Pohlman, 2021-02-02 *Broadcasting the Faith* tells the riveting story of the American church's embrace of radio in the early decades of the twentieth century By investigating major radio personalities like Walter Maier Aimee Semple McPherson Harry Emerson Fosdick and Charles Fuller this study considers the implications for theology in America when Christianity moved to the airwaves In the heyday of radio religious radio preachers sought to use their programs to counter the secularization of American culture Ultimately however their programs contributed to secularization by accelerating changes already evident in both the conservative and liberal streams of American Christianity To reach a vast American audience radio preachers transformed their sectarian messages into a religion more suitable to the masses thereby altering the very religion it aimed to preserve To make religion accessible to large and diverse audiences radio preachers accommodated their messages in ways suited to the medium of radio Although religious radio preachers set forth to advance the influence of religion in American society their choice to limit theological substance ironically promoted the secularization of the American church

Higher Cortical Functions in Man Alexandr Romanovich Luria,2012-12-06 This

full length translation of Professor Luria s book introduces to the English speaking world a major document in neuropsychology summarizing Professor Luria s earlier contributions to that area for nearly a third of a century It is a monumental contribution Nothing of this scope exists in the Western literature of this field with the possible exception of Ajuriaguerra and Hecaen s book in French on the cerebral cortex Professor Luria s book thus marks a further and decisive step toward the eventual coalescence of neurology and psychology a goal to which only a few laboratories in the East and West have been devoted over the last decades The book is unique in its organization The first half deals with observations and interpretations concerning the major syndromes of man s left cerebral hemisphere those grievous distortions of higher functions traditionally described as aphasia agnosia and apraxia There is also a detailed and brilliant analysis of the syndrome of massive frontal lobe involvement The entire second half of the book is given over to a painstaking description of Professor Luria s tests many of them introduced by himself and set out in such detail that anyone could repeat them and thus verify Professor Luria s interpretations
