NAEP 1992 Mathematics State Report for New York National Assessment of Educational Progress, Princeton, NJ., 1993. In 1990, the National Assessment of Educational Progress (NAEP) included a Trial State Assessment, which for the first time in the NAEP's history, made voluntary state-by-state assessments. This 1992 mathematics report marks the first attempt of the National Center for Education Statistics (NCES) to shift to standards-based reporting of National Assessment statistics. NAEP results are reported by achievement levels, which are descriptions of how students should perform relative to a body of content reflected in the NAEP frameworks. In other words, how much students should know.

The 1992 assessment covered six mathematics content areas:

1. numbers and operations
2. measurement
3. geometry
4. data analysis, statistics, and probability
5. algebra and functions
6. estimation
